La Casistica

Popolazione Liguria al 31/12/2010 (dati ISTAT):

1.616.788

Δ 2009: + 0.49%

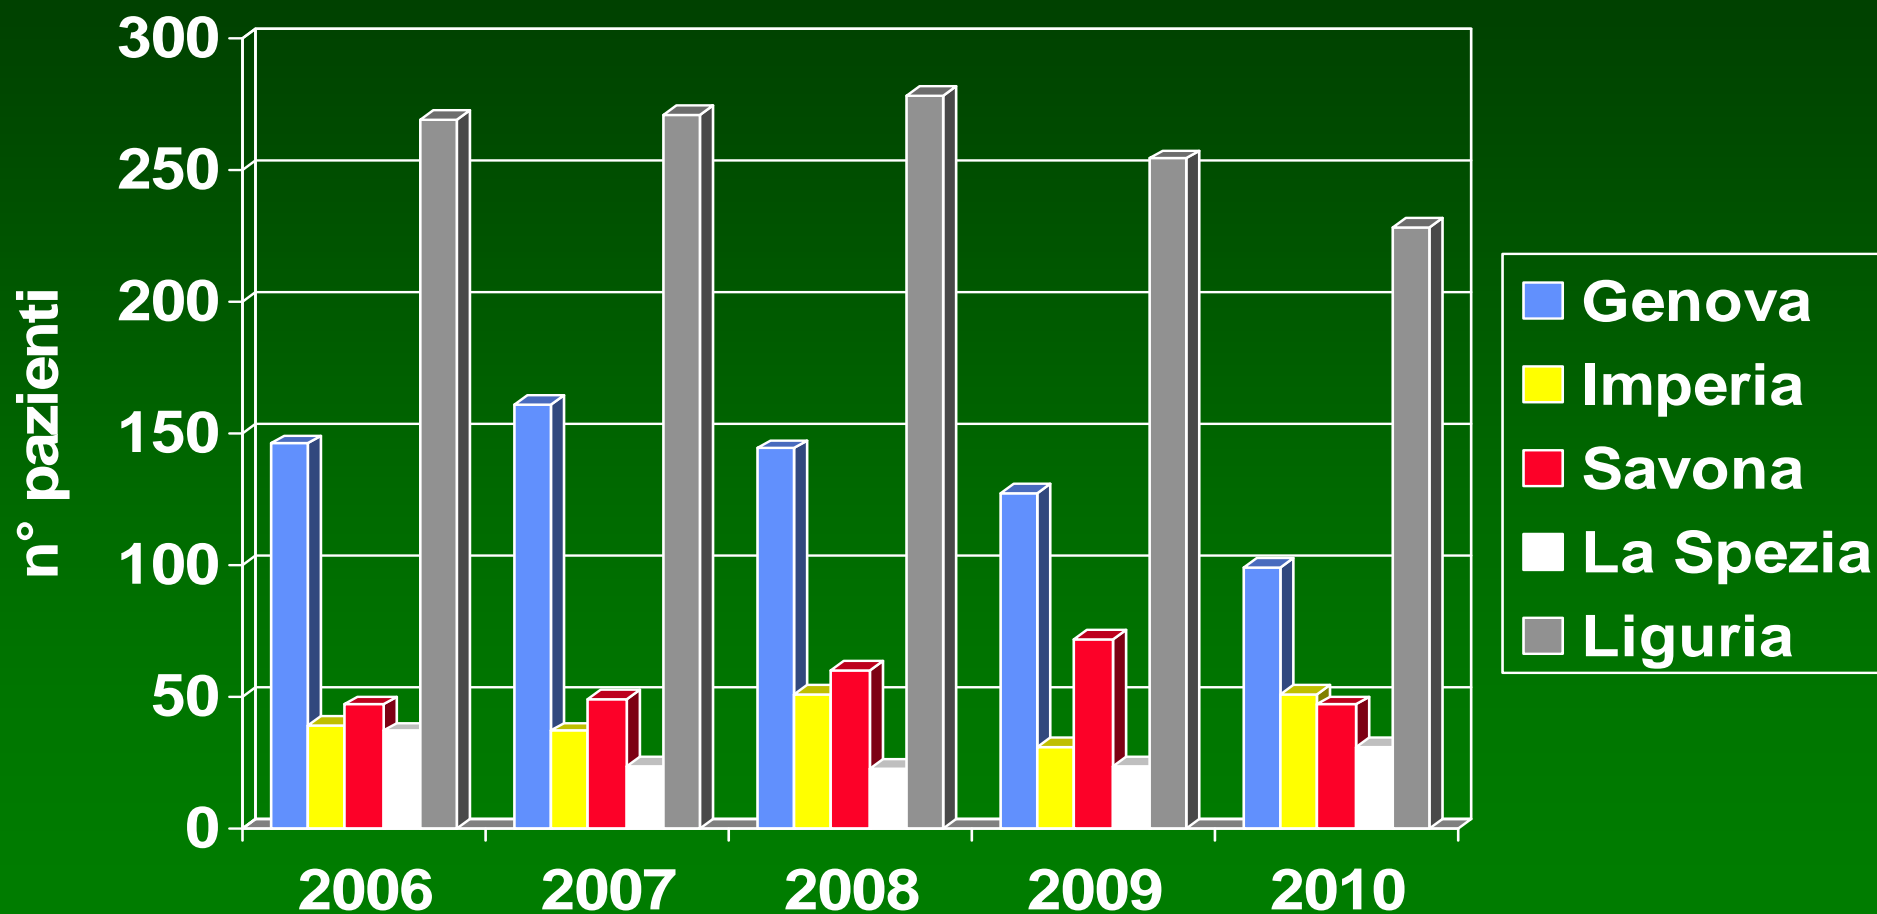

Registro Regionale di Dialisi e Trapianto

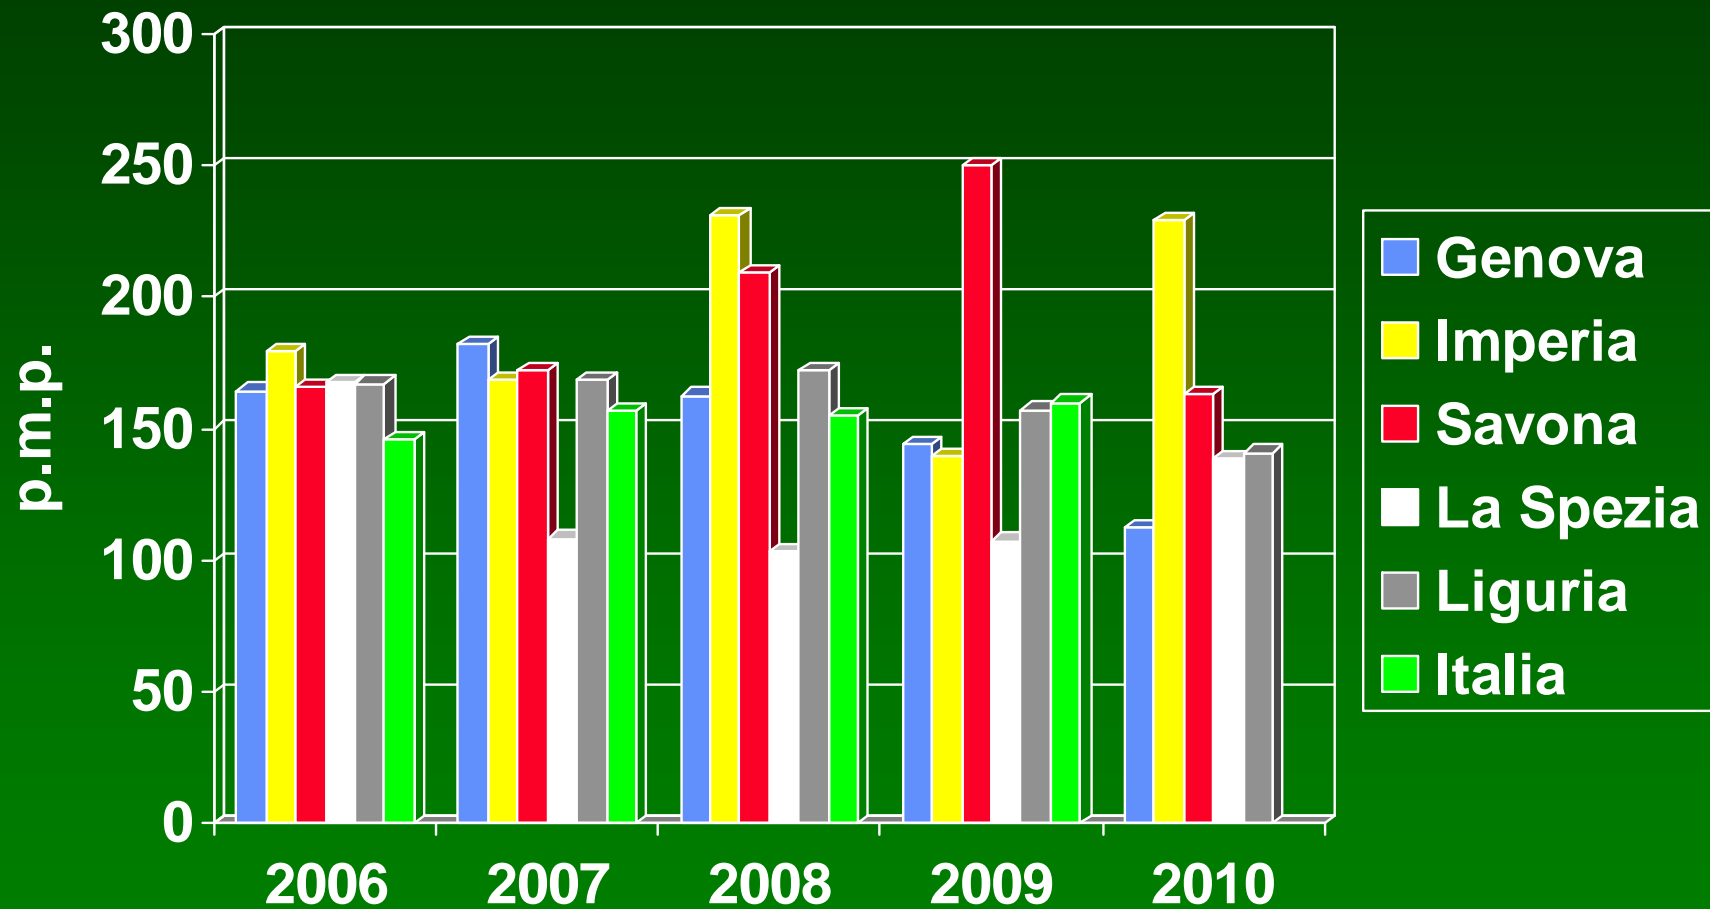

Invio dati 2010

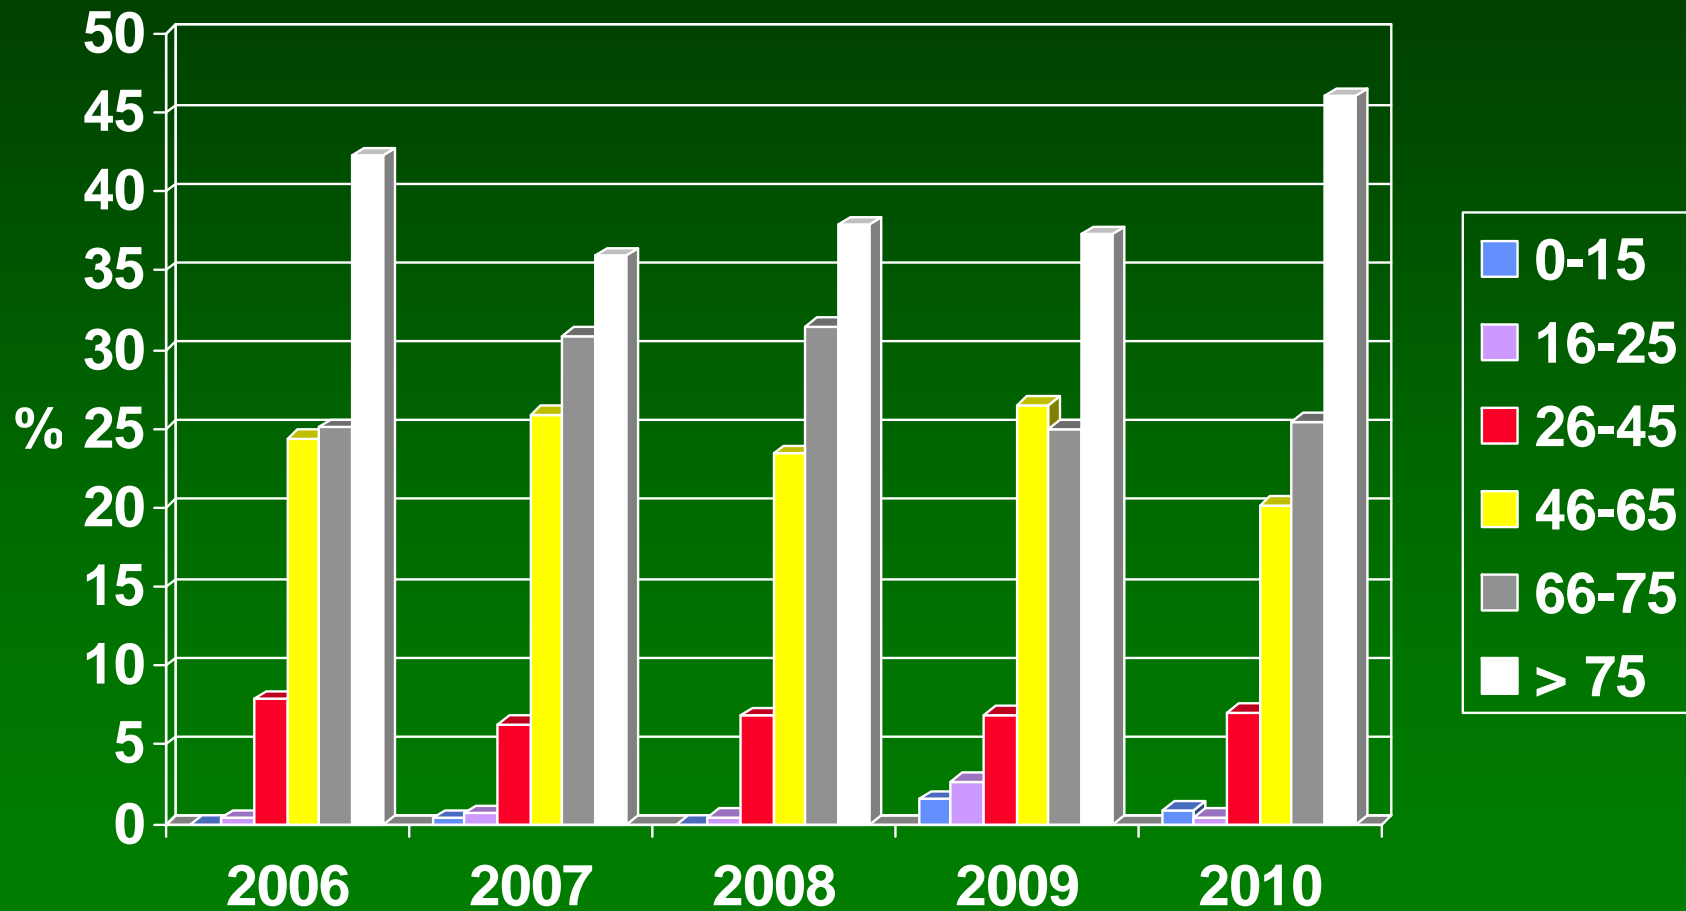

Pazienti incidenti in dialisi

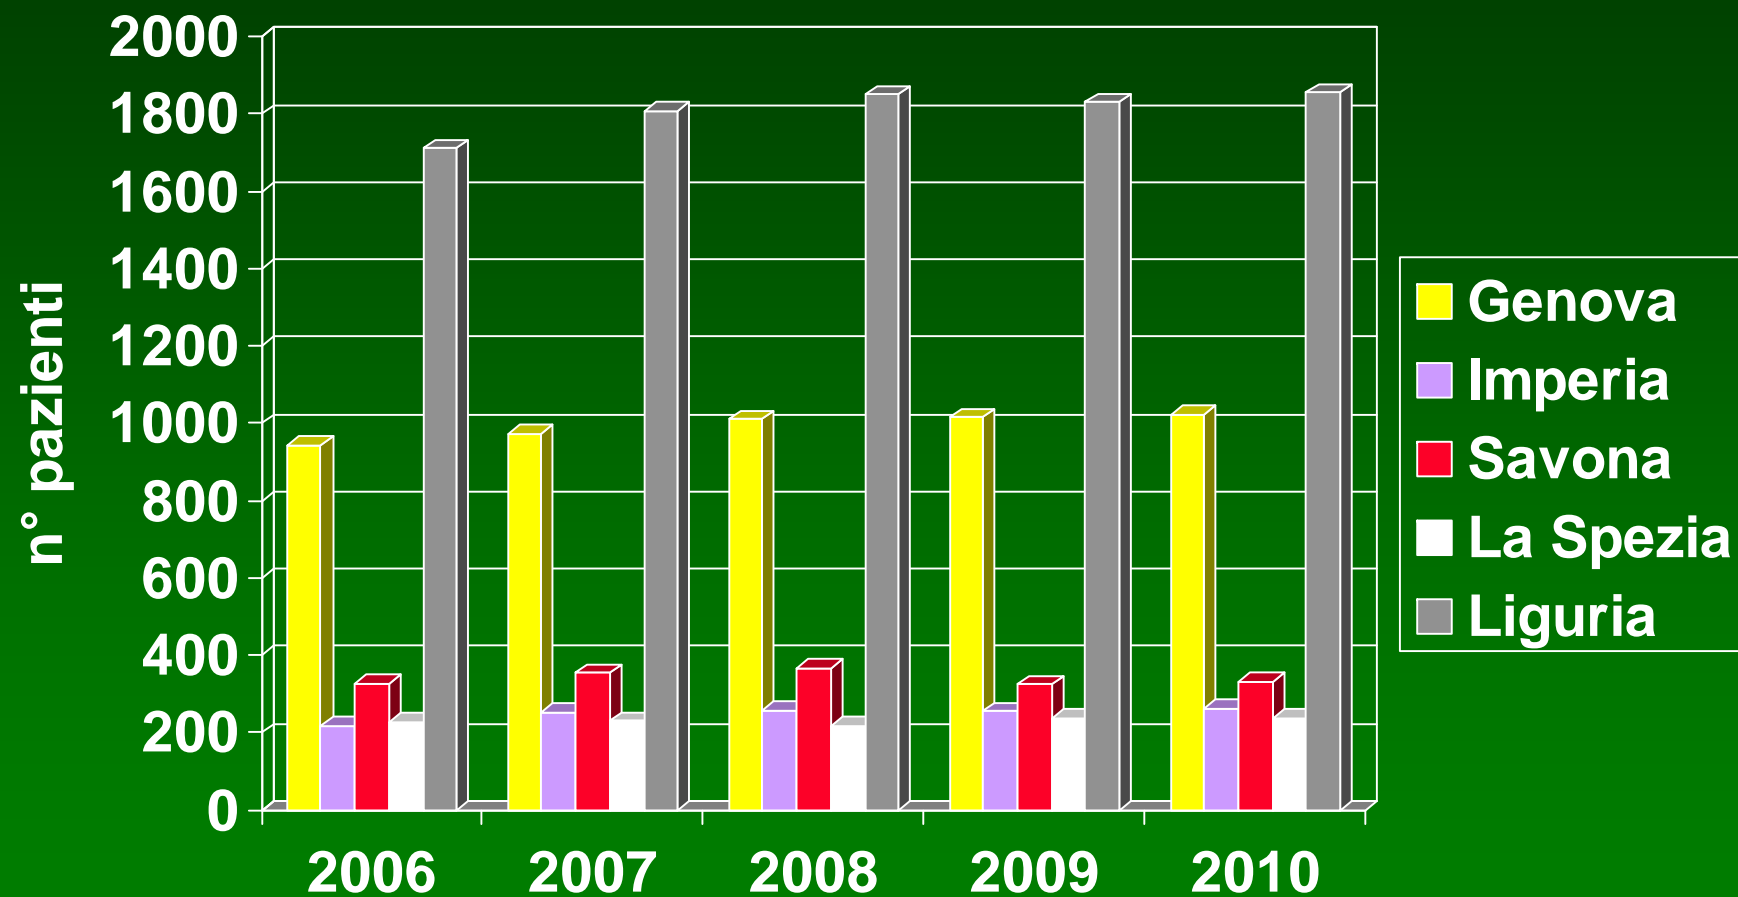

Pazienti incidenti in dialisi p.m.p.

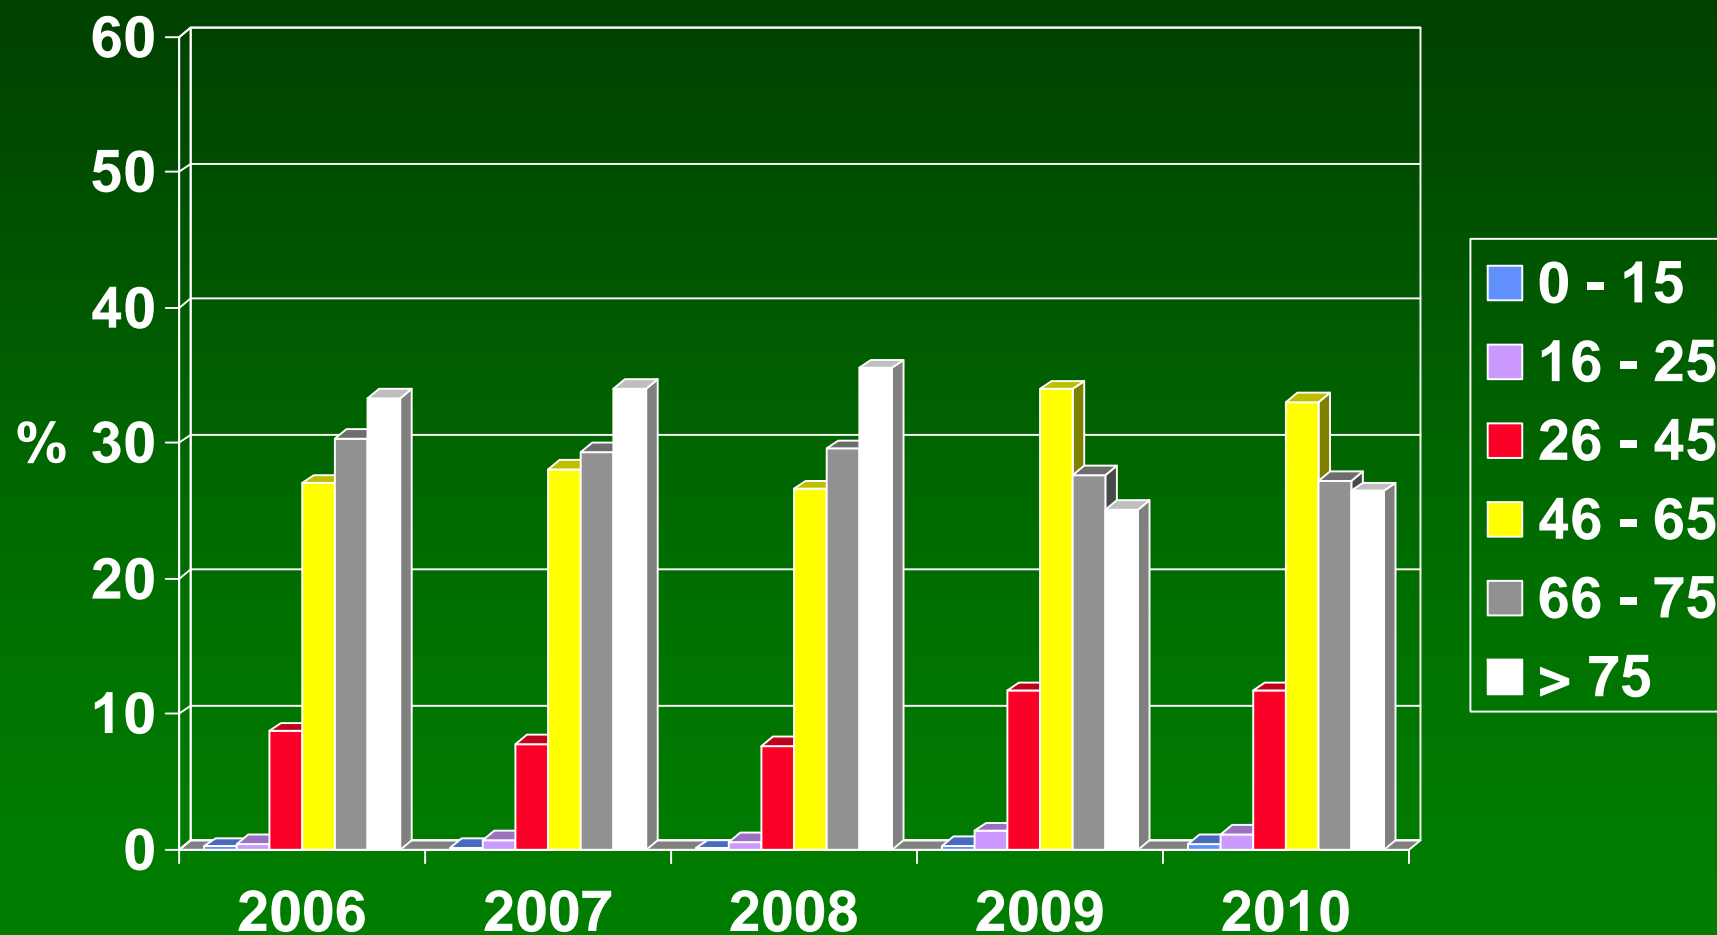

Pazienti incidenti suddivisi per età

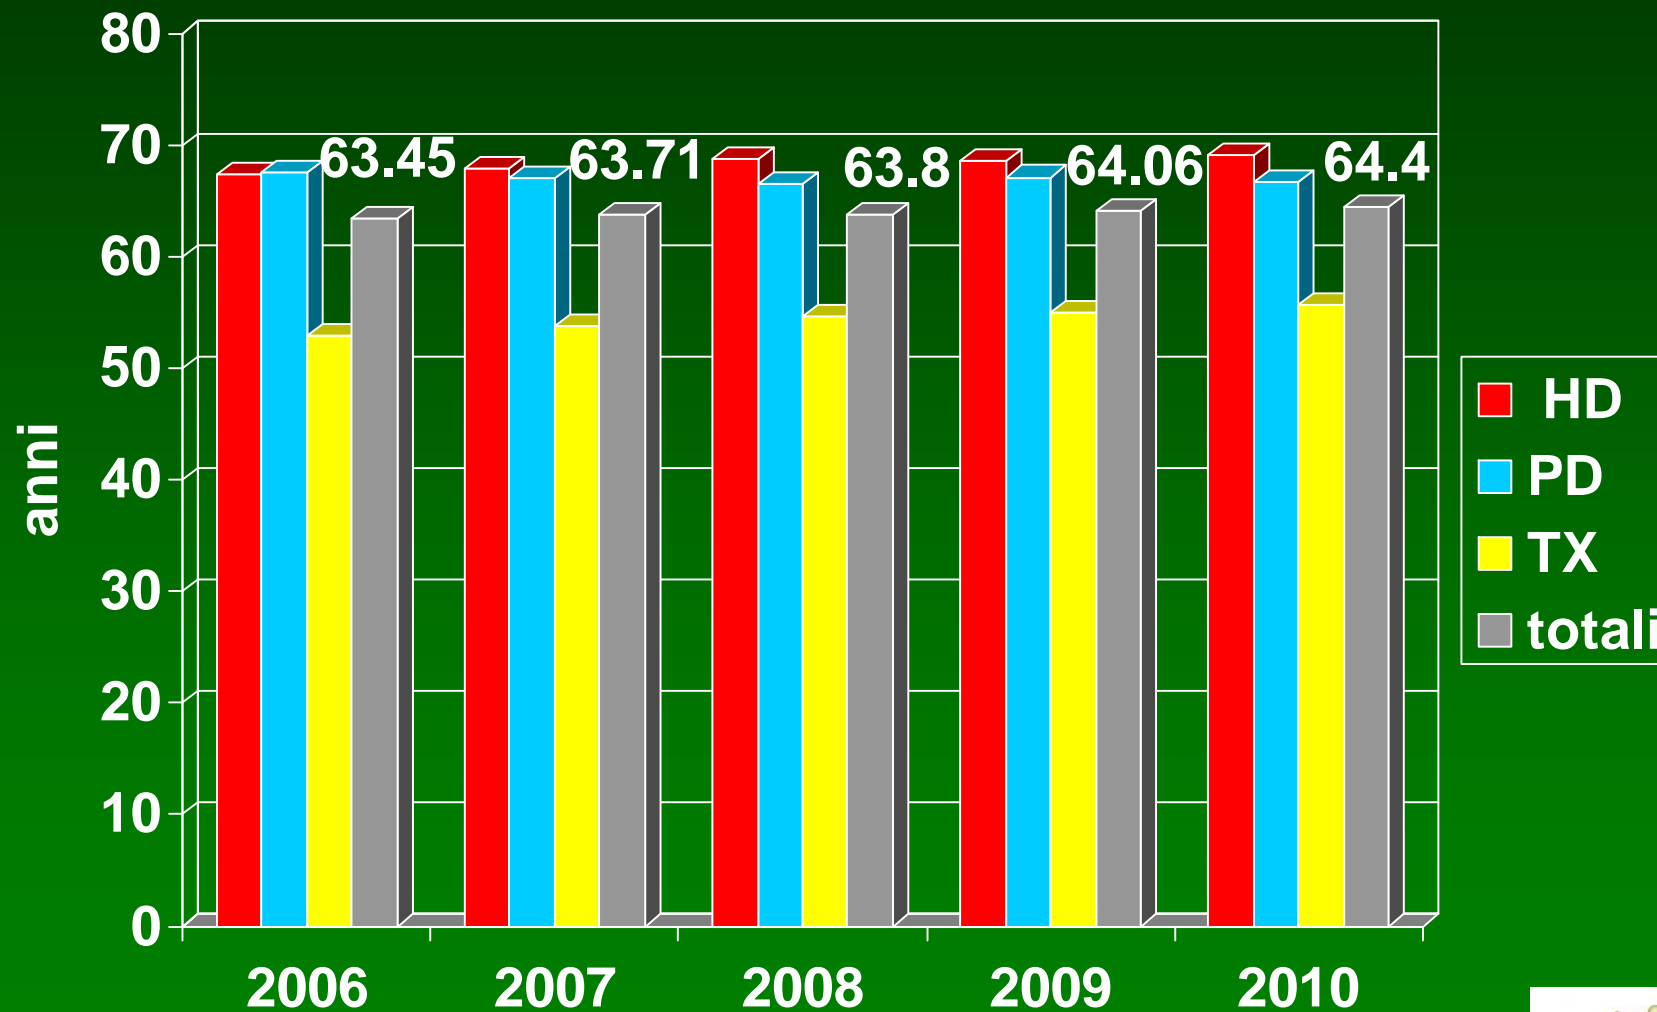

Pazienti prevalenti in terapia sostitutiva al 31/12/10

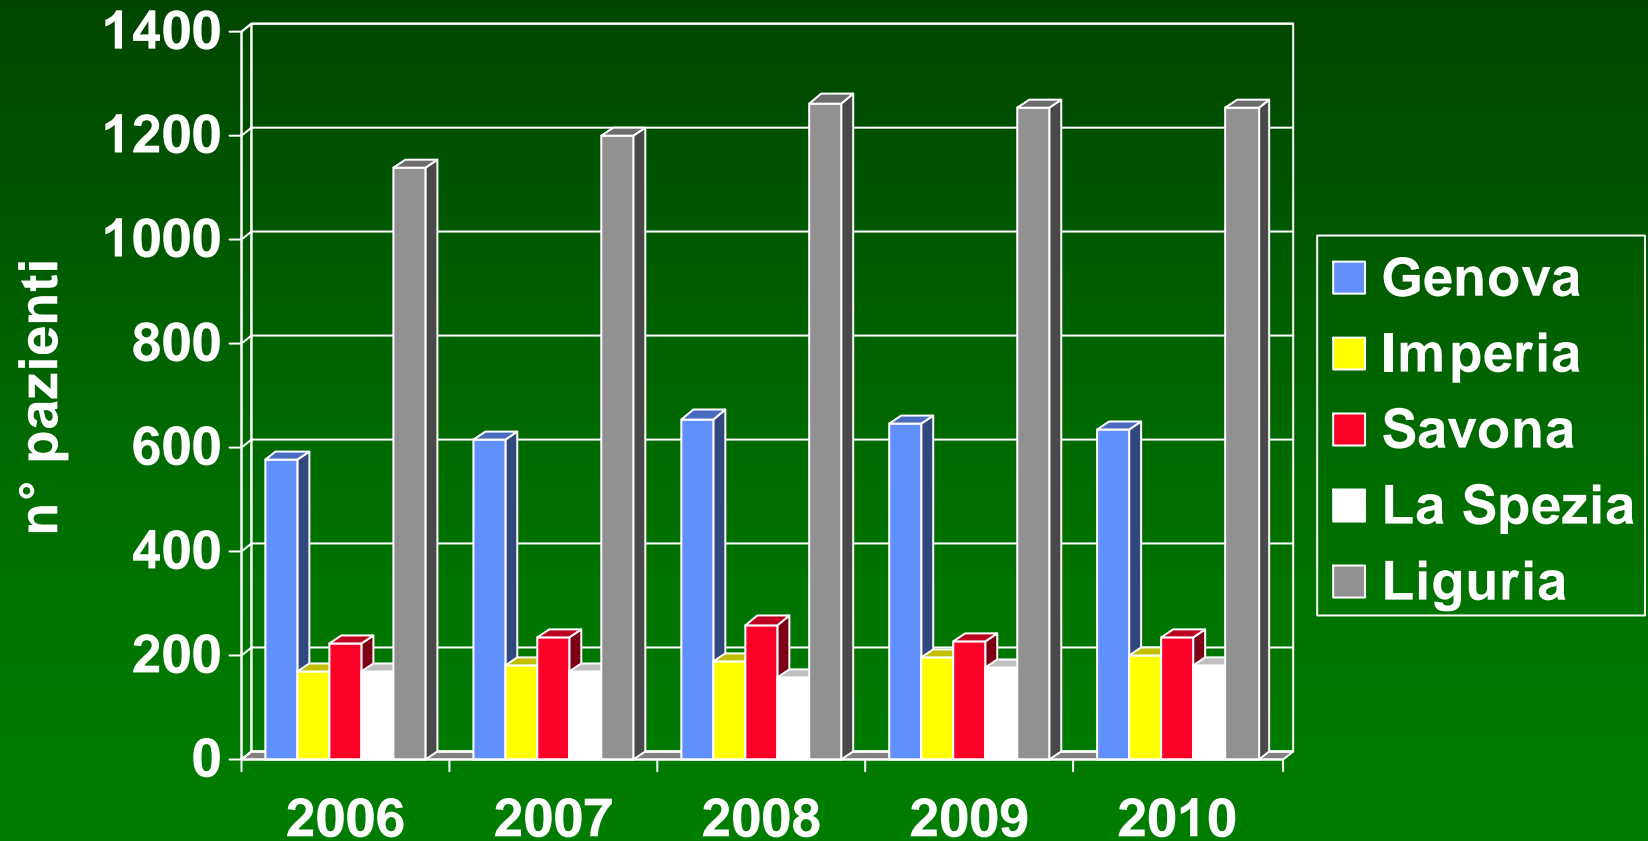

Pazienti prevalenti in terapia sostitutiva al 31/12/10 suddivisi per classi di età

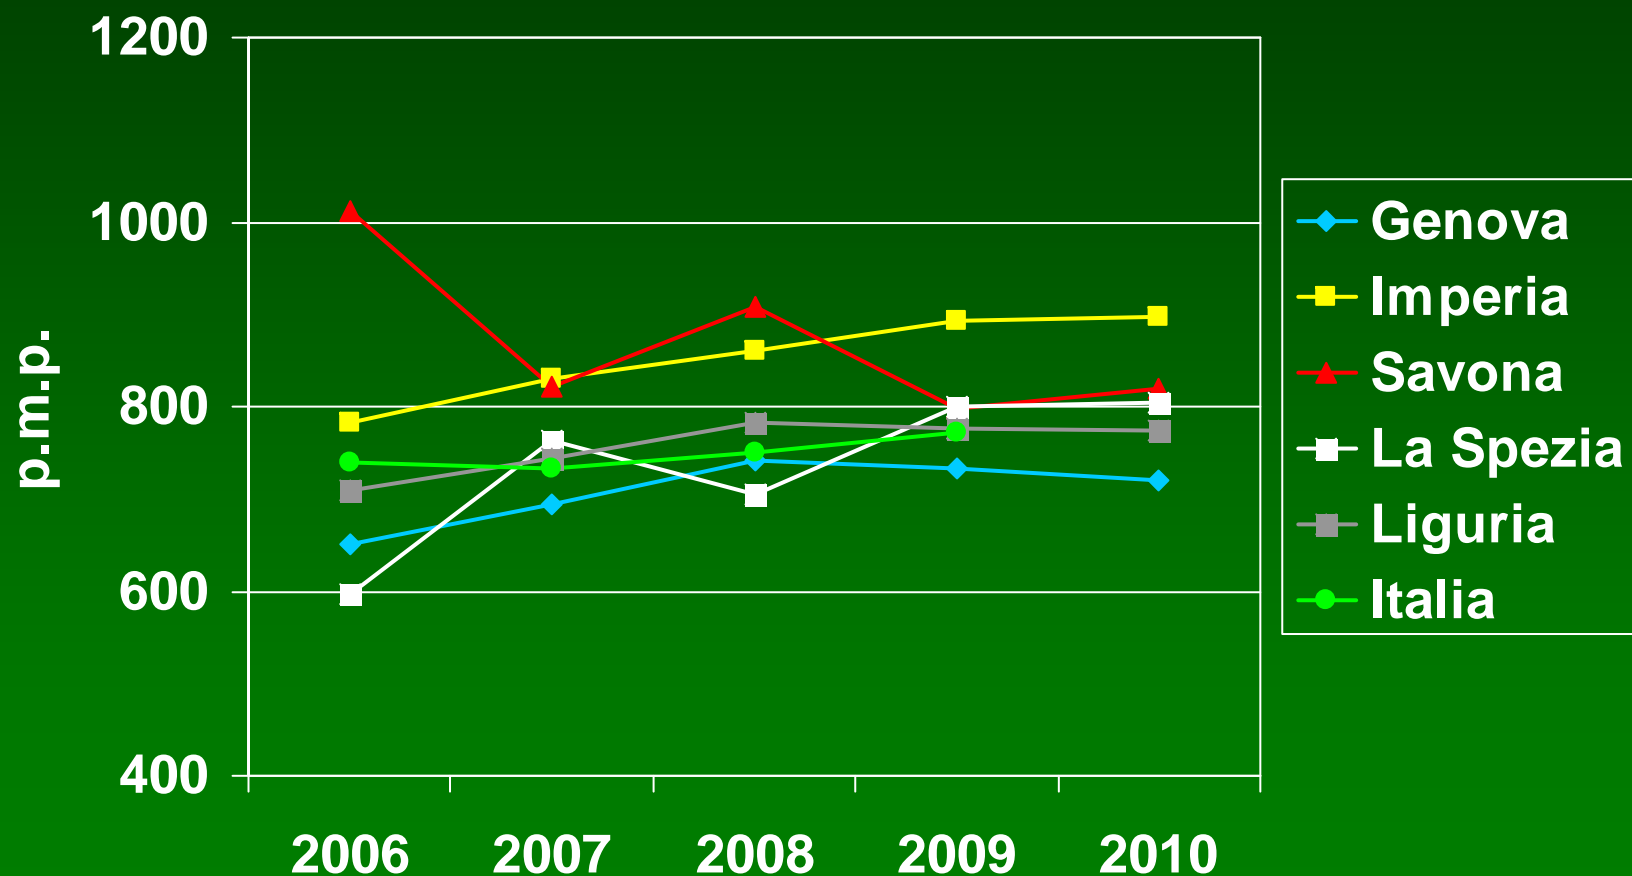

Età media dei Pazienti prevalenti in terapia sostitutiva al 31/12/10

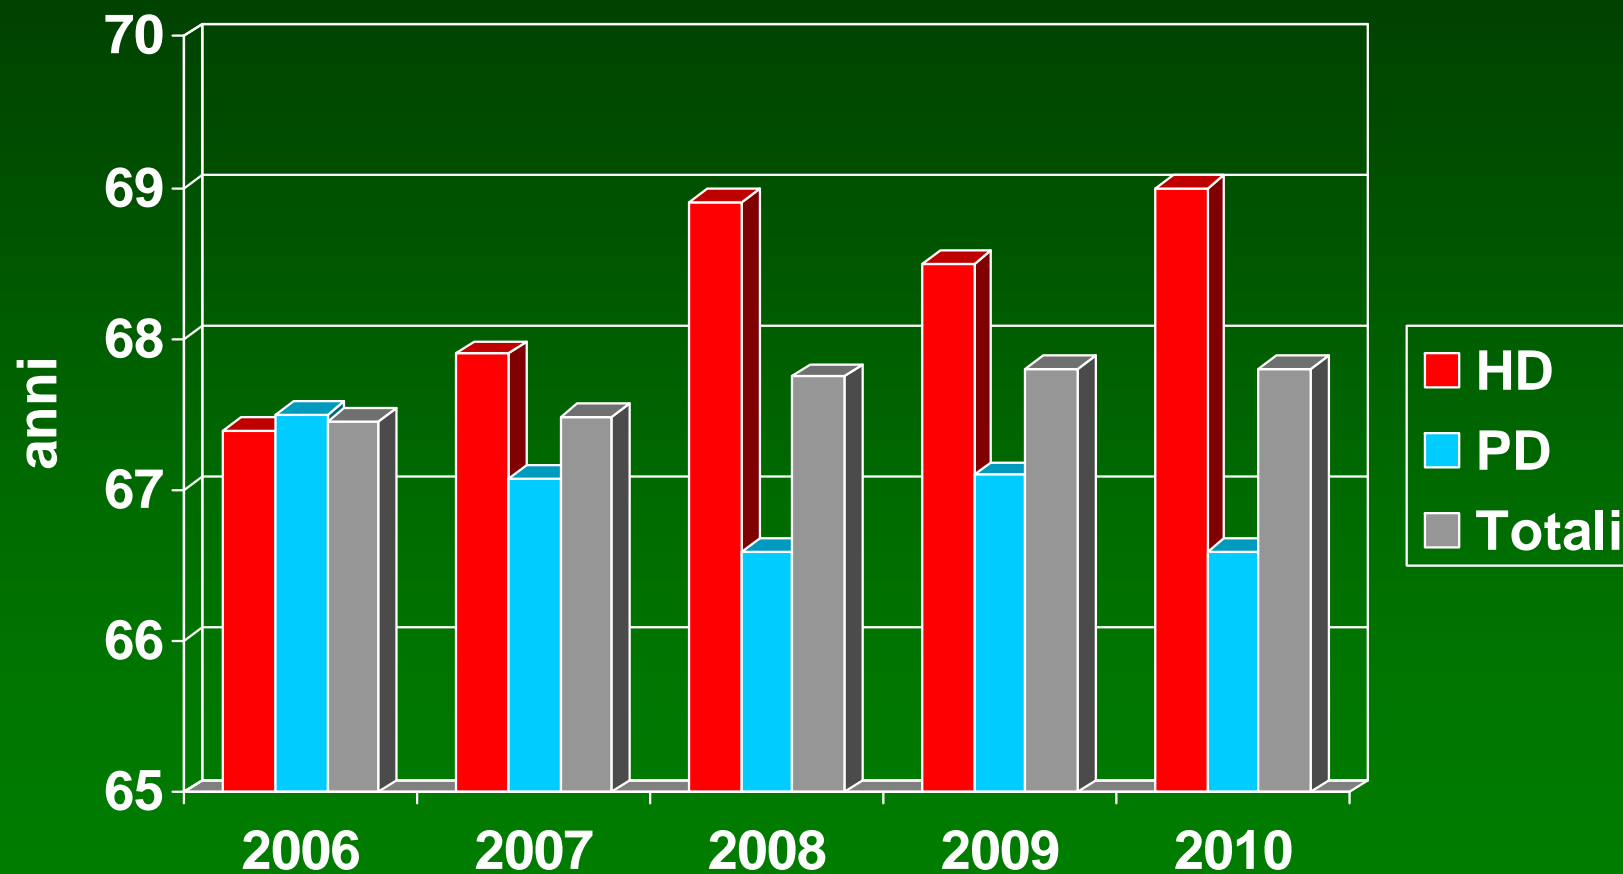

Pazienti prevalenti in dialisi al 31/12/10

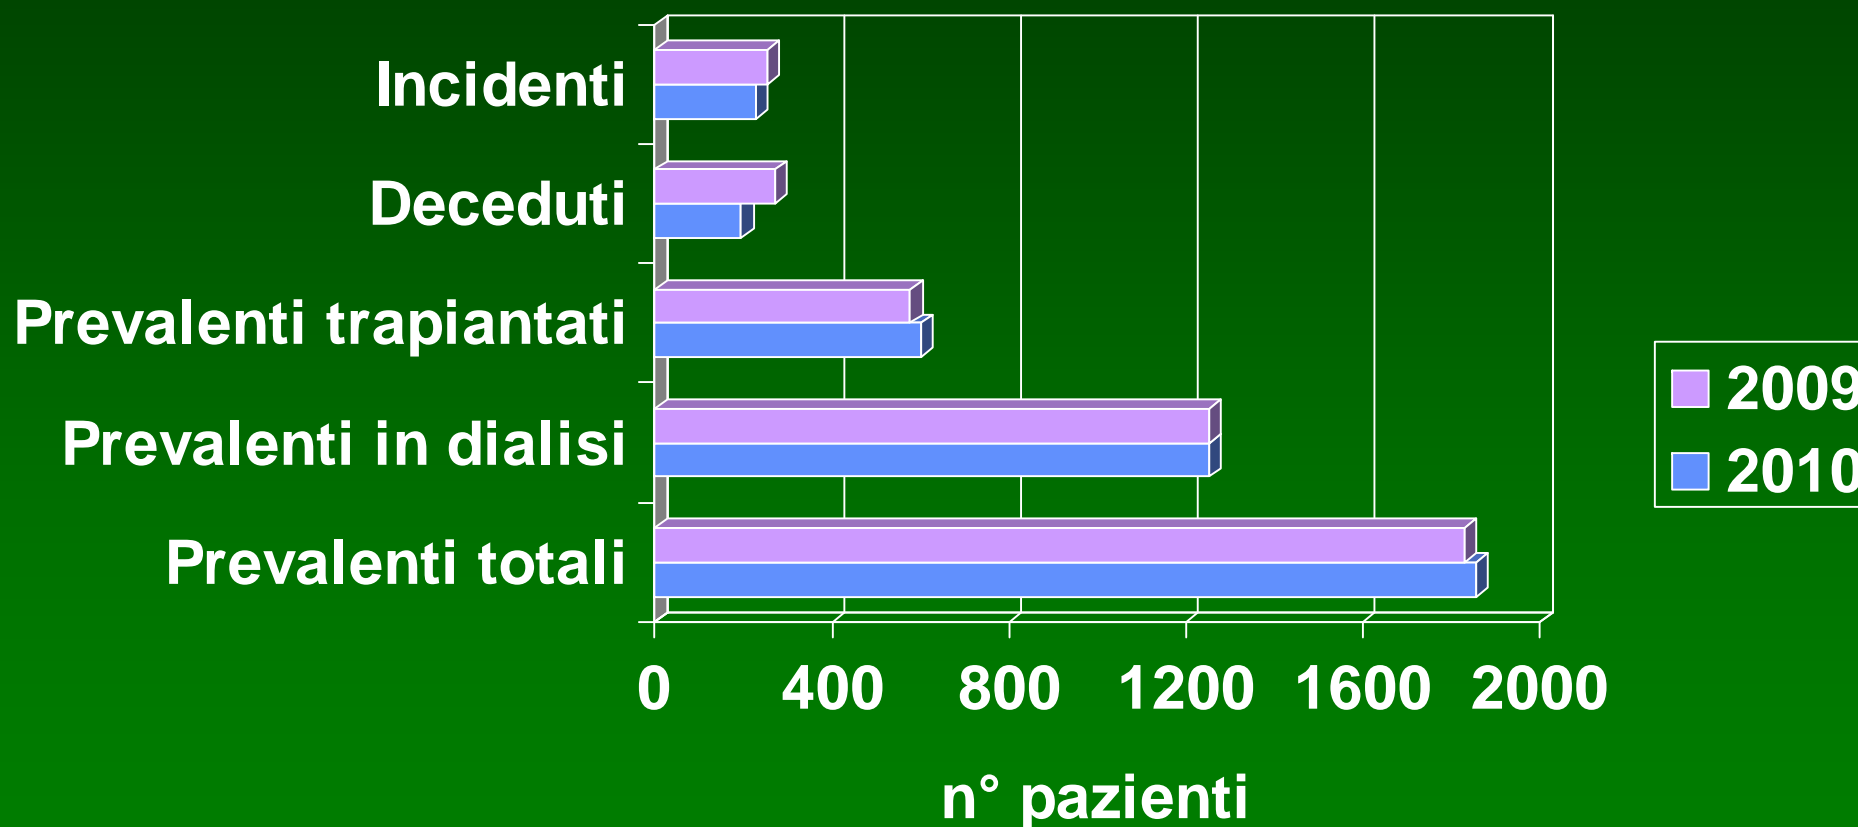

Pazienti prevalenti in dialisi al 31/12/10 (p.m.p.)

Età media dei Pazienti prevalenti in dialisi al 31/12/10

Registro Regionale di Dialisi e Trapianto Bilancio entrate/uscite anni 2009/2010

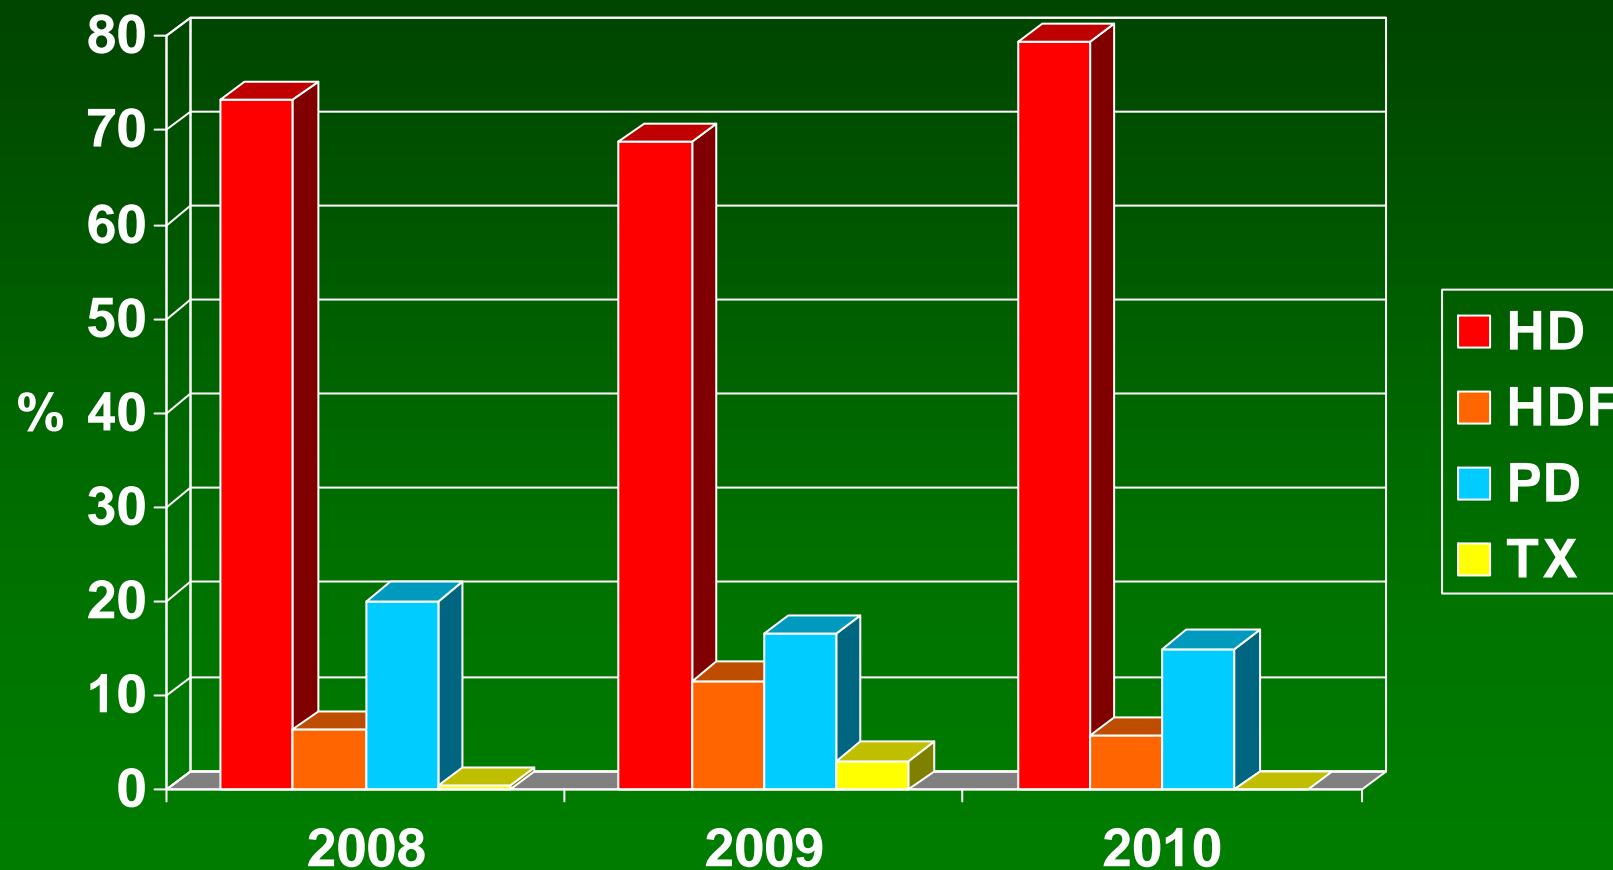

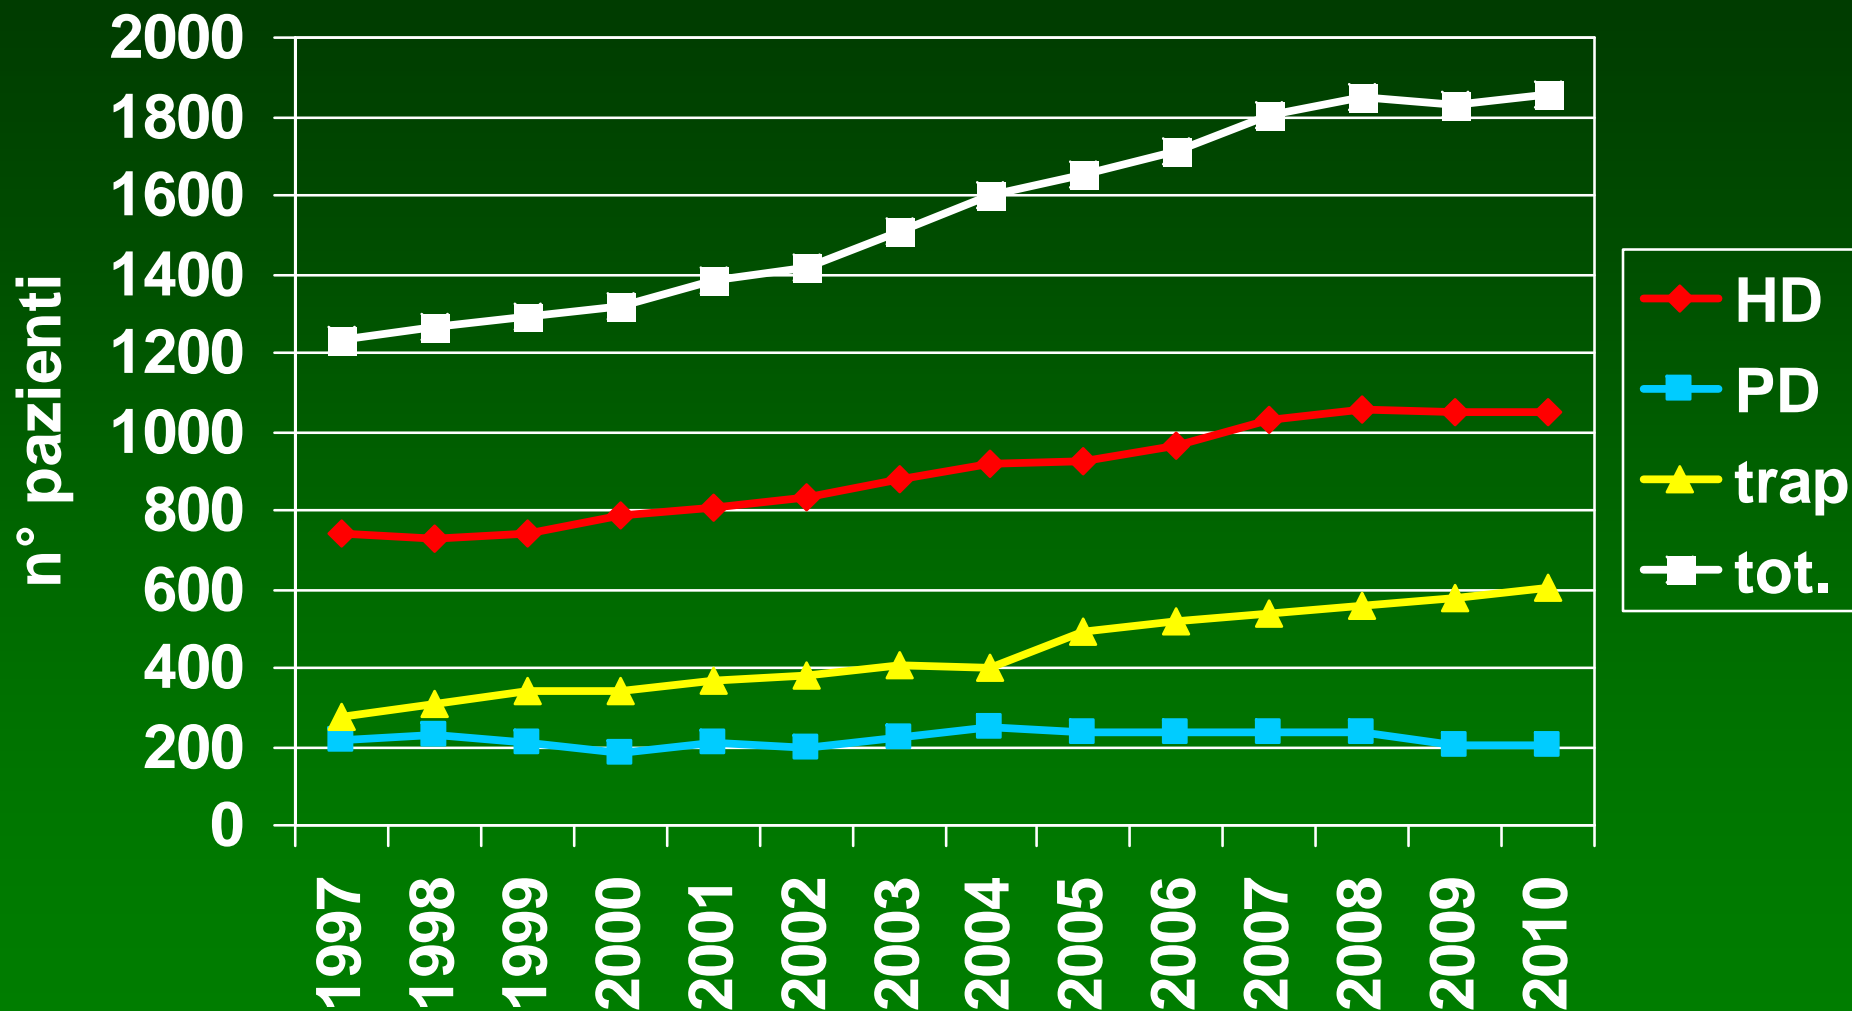

Tipologia dei trattamenti

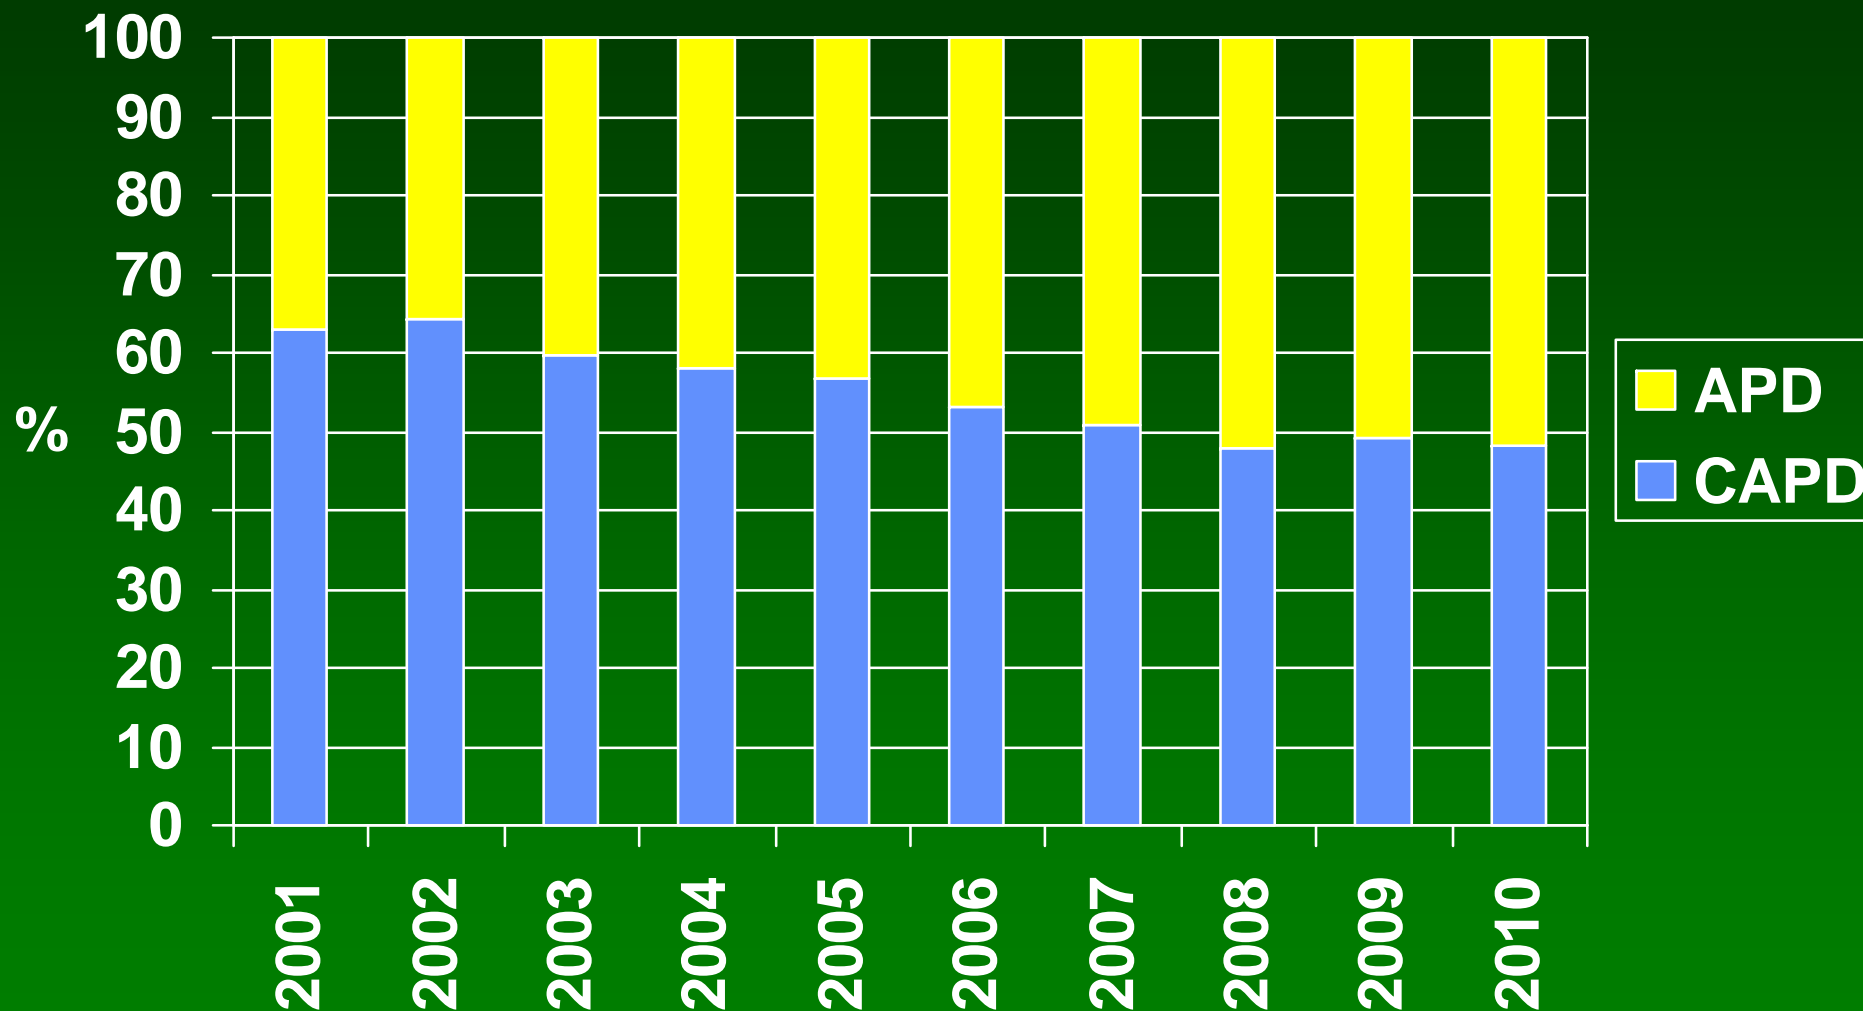

Tipologia di trattamento nei Pazienti incidenti

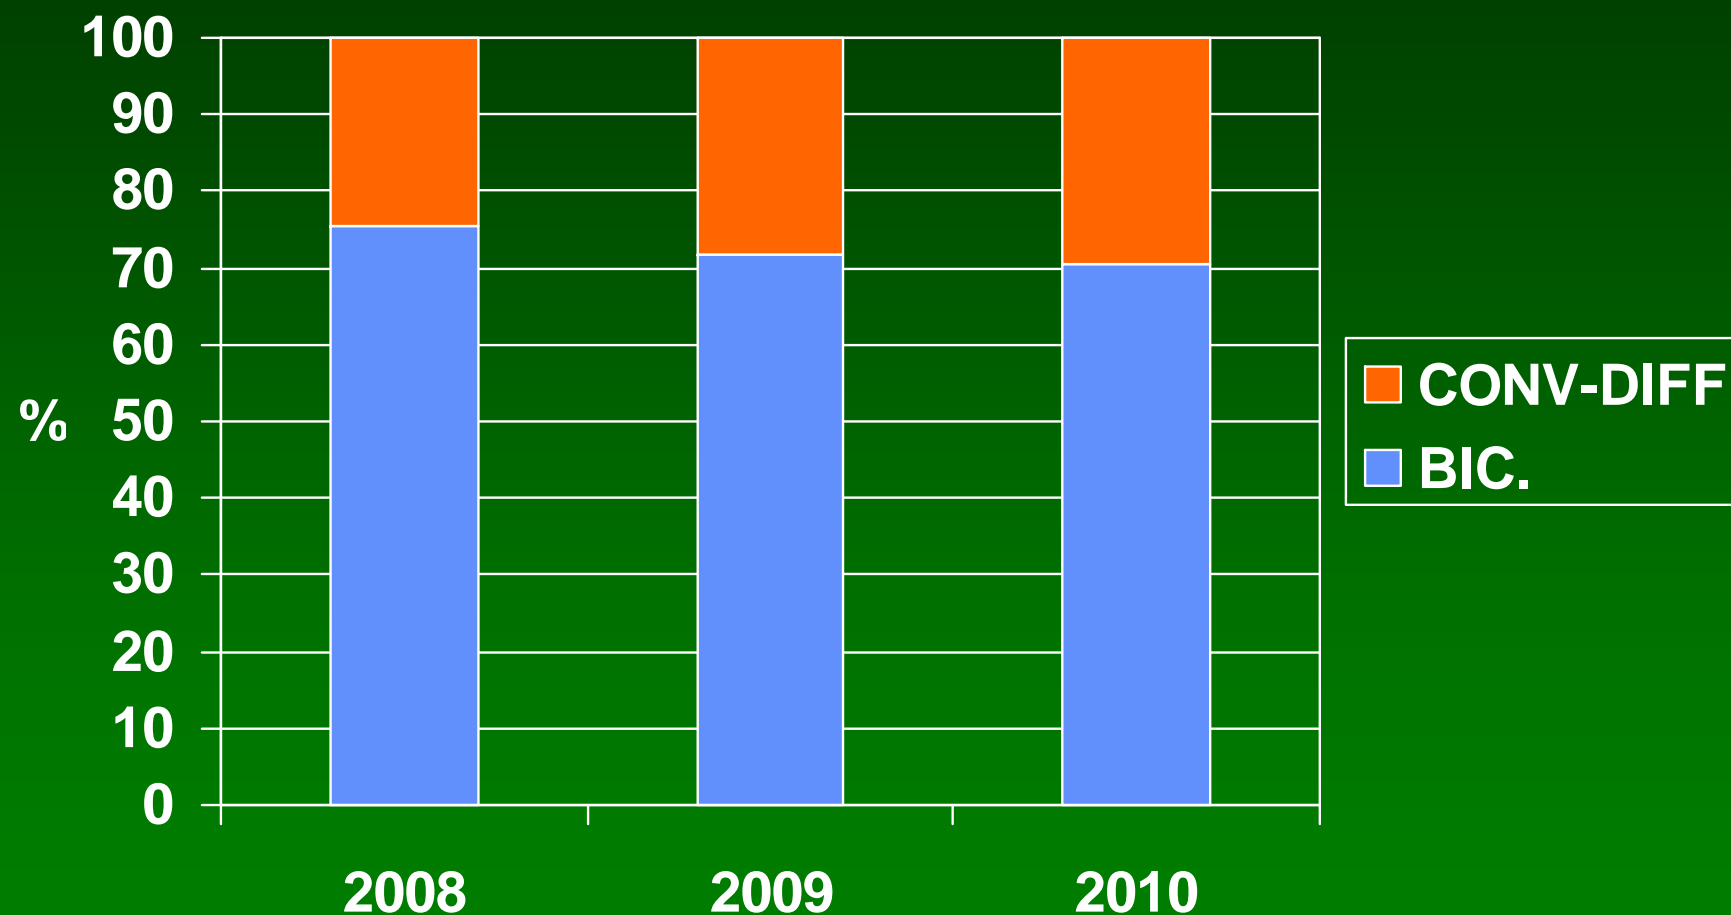

Tipologia di trattamento nei Pazienti prevalenti al 31/12/10

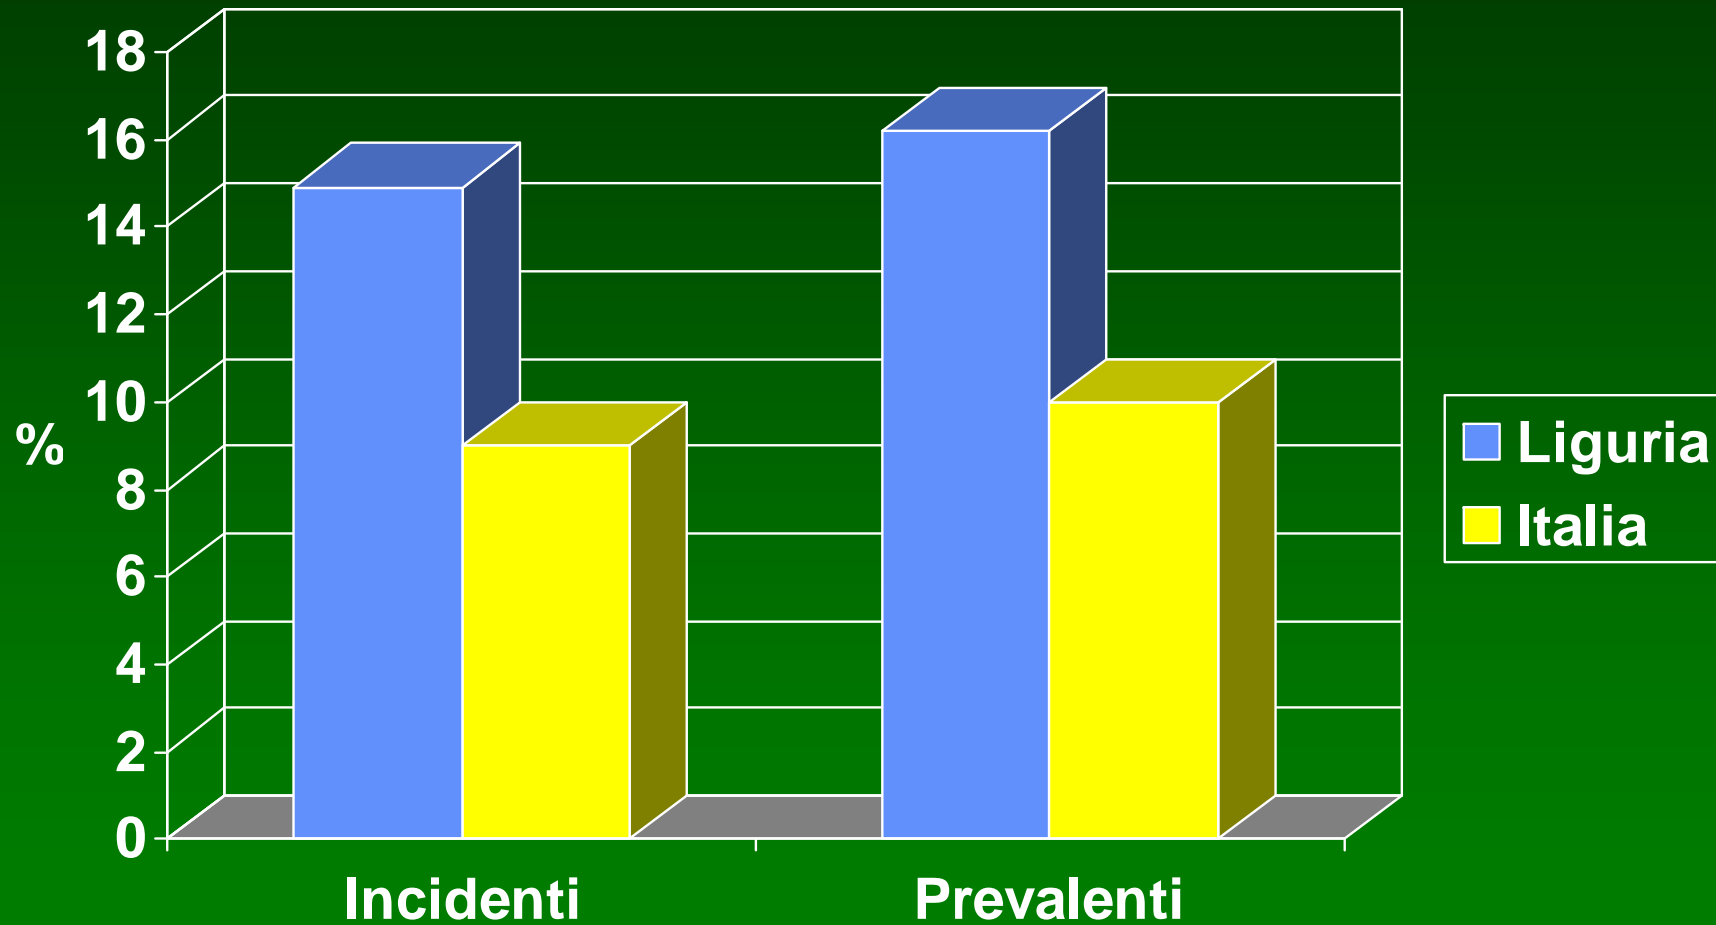

Metodiche di PD nei Pazienti prevalenti al 31/12/10

Metodiche di HD nei Pazienti prevalenti al 31/12/10

Pazienti in trattamento con Dialisi Peritoneale Confronto Liguria (2010) vs Italia (2009)

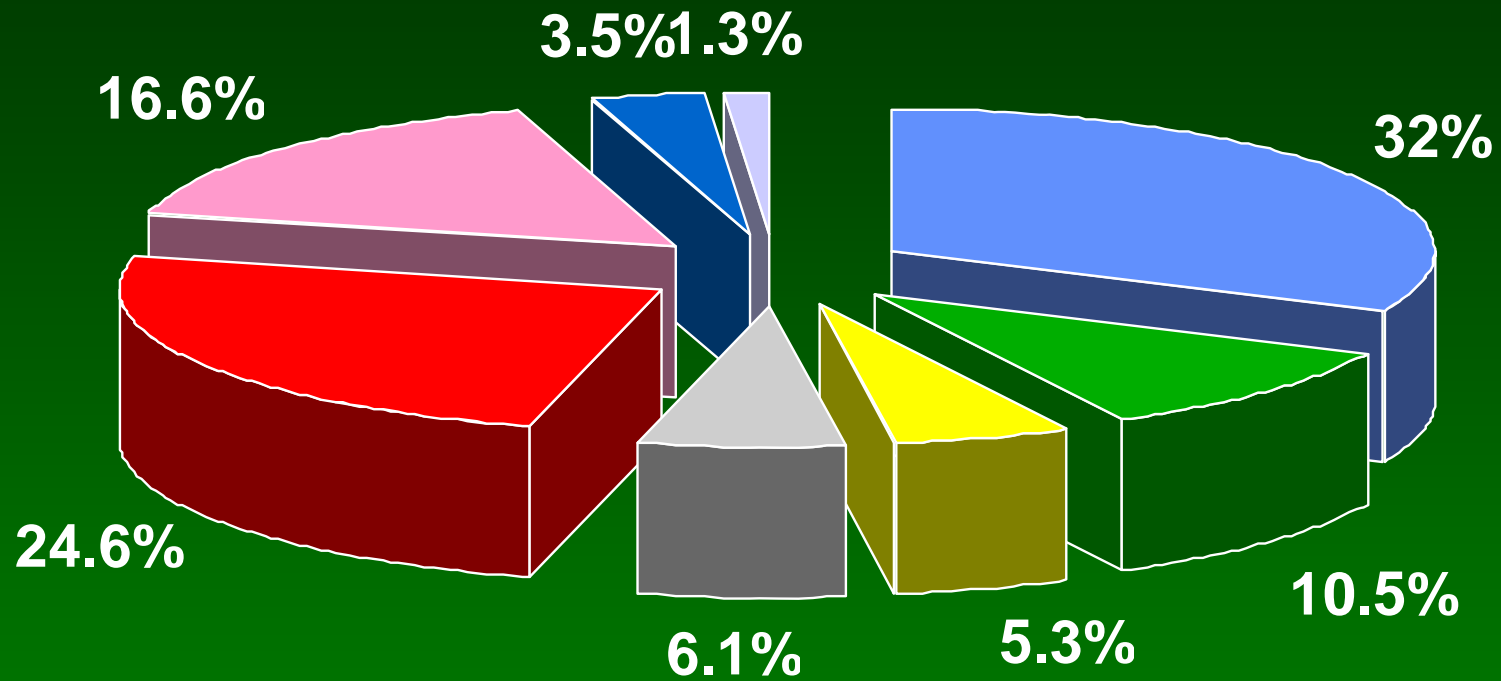

Dati clinici

Nefropatie nella popolazione incidente

■ N.D.

■ GN

■ NTI

■ N.ERED

■ N.VASCOL

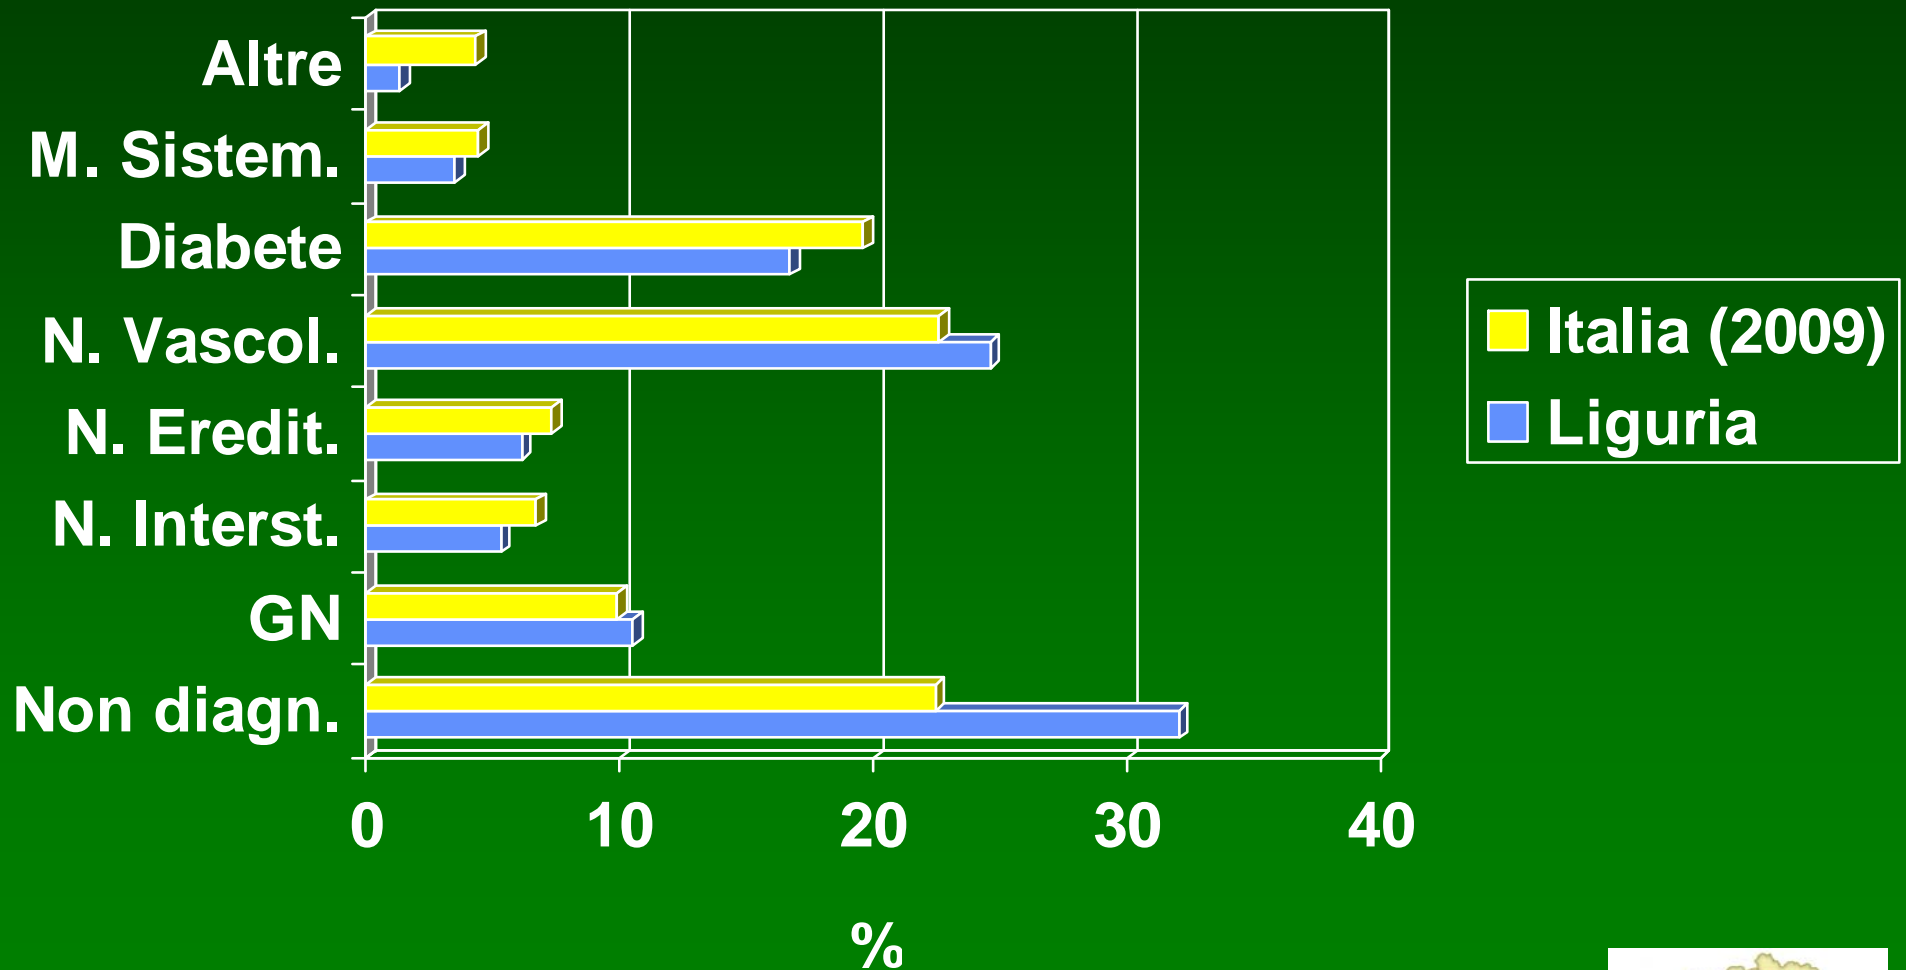

■ N.DIAB

■ M.SIST

■ ALTRO

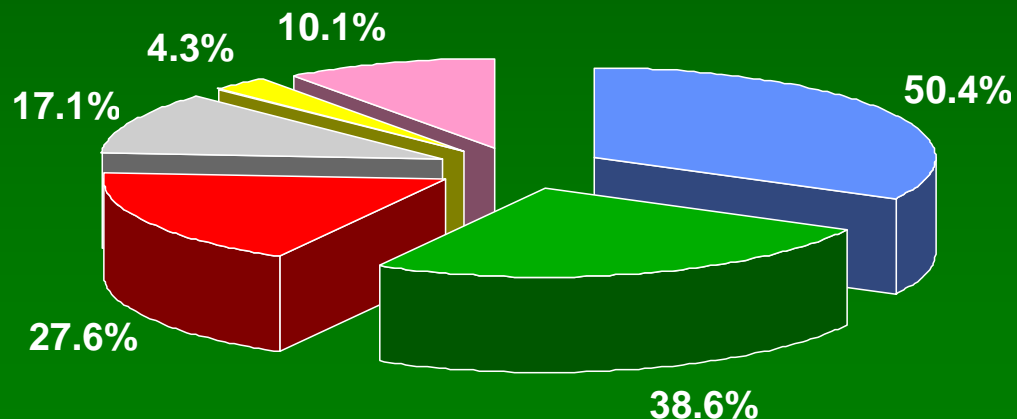

Cause di ESRD nella popolazione incidente: confronto Liguria (2010) vs Italia (2009)

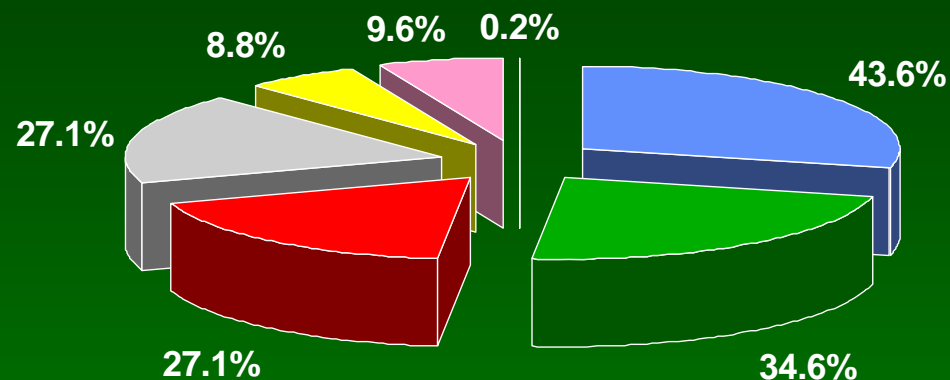

Fattori comorbidi nella popolazione in terapia sostitutiva

Incidenti

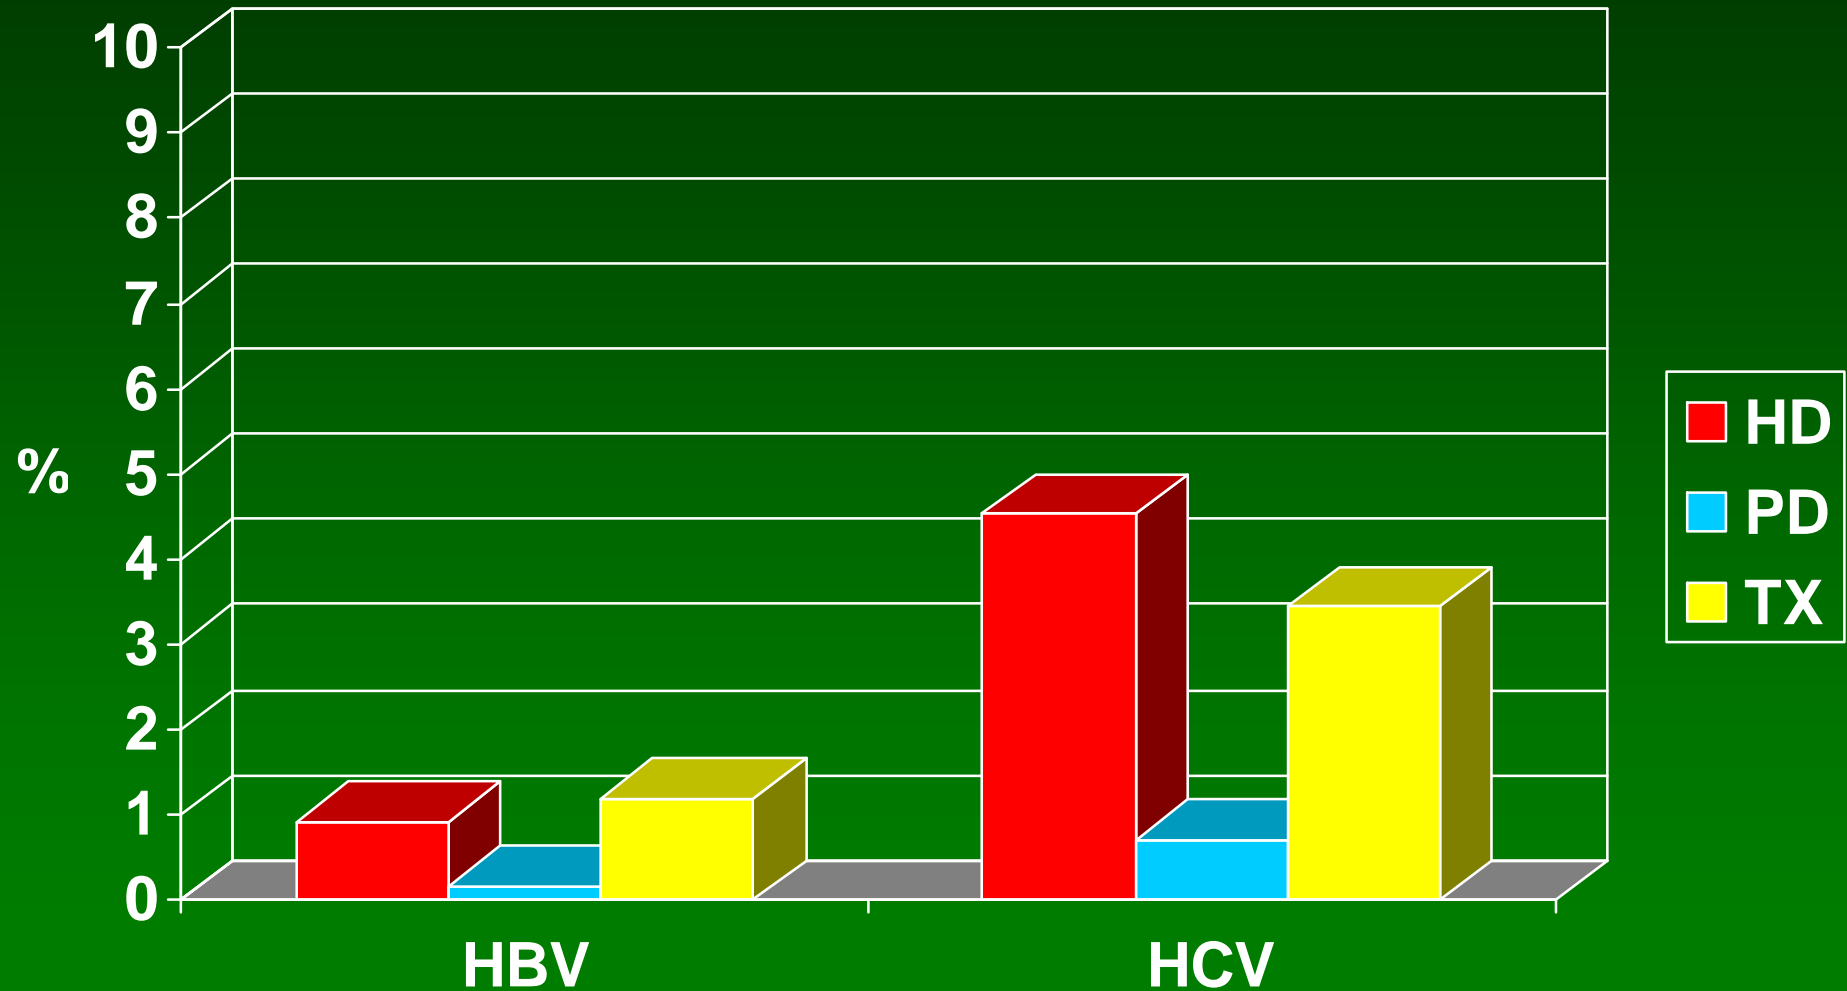

Prevalenti

- Ipertensione arteriosa
- Interessamento cardiaco
- Vasculopatia periferica
- Diabete
- Epatopatia
- Neoplasia
- HIV+

Positività per i virus dell'epatite nella popolazione prevalente al 31/12/10

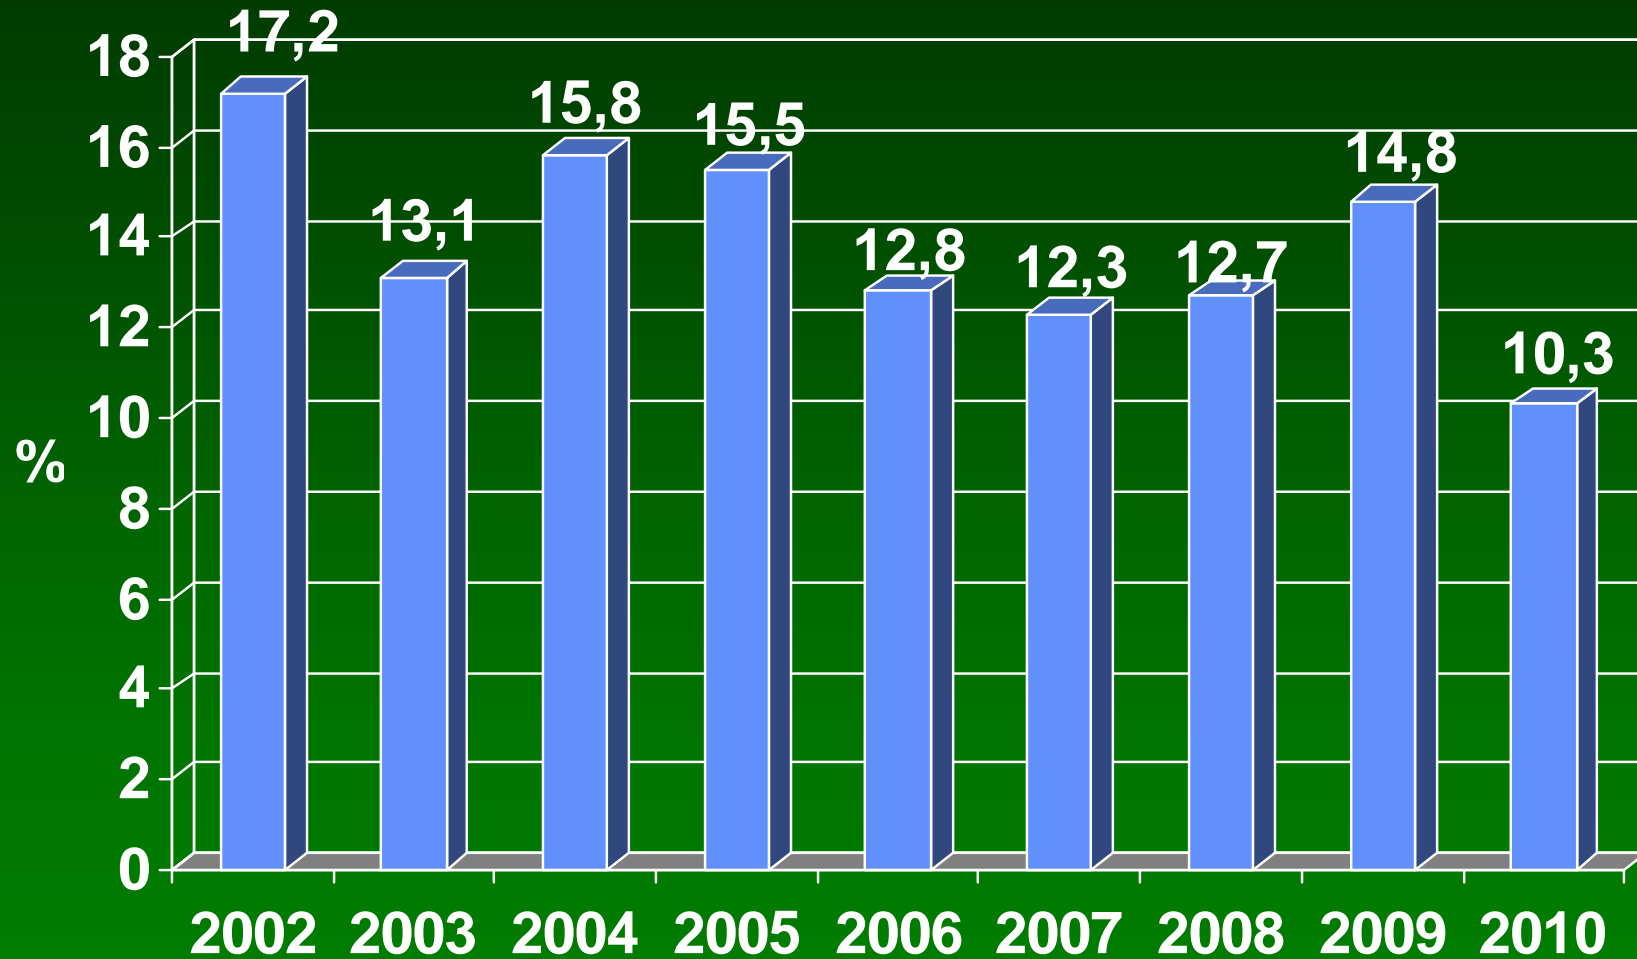

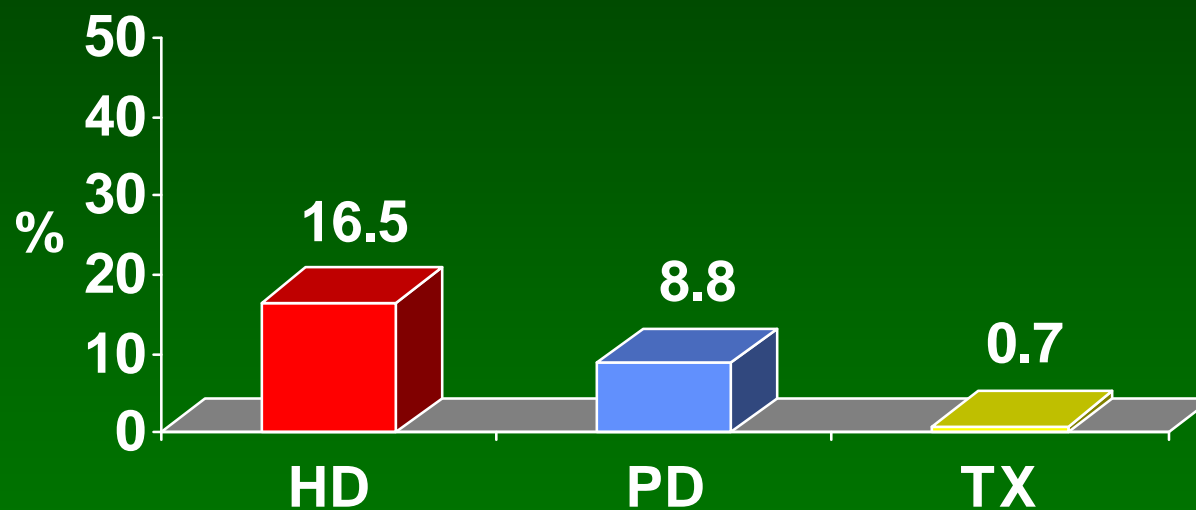

Mortalità

Gross Mortality nei Pazienti in dialisi

Percentuale di decessi secondo le metodiche

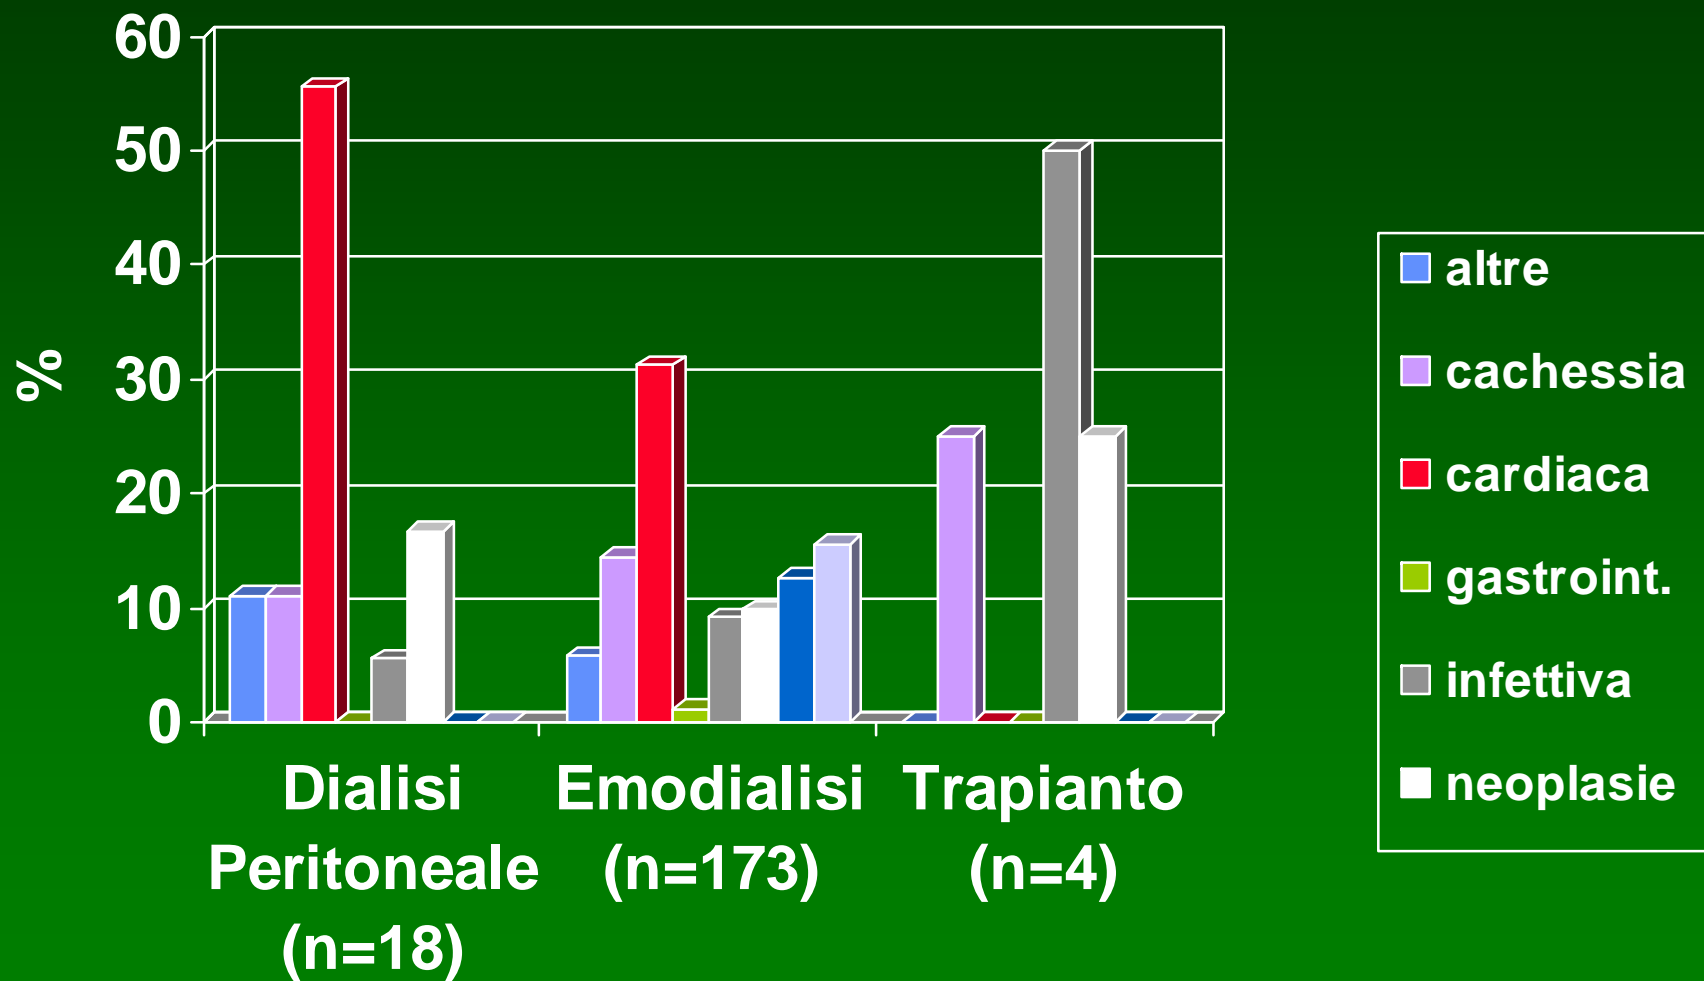

■ HD

■ PD

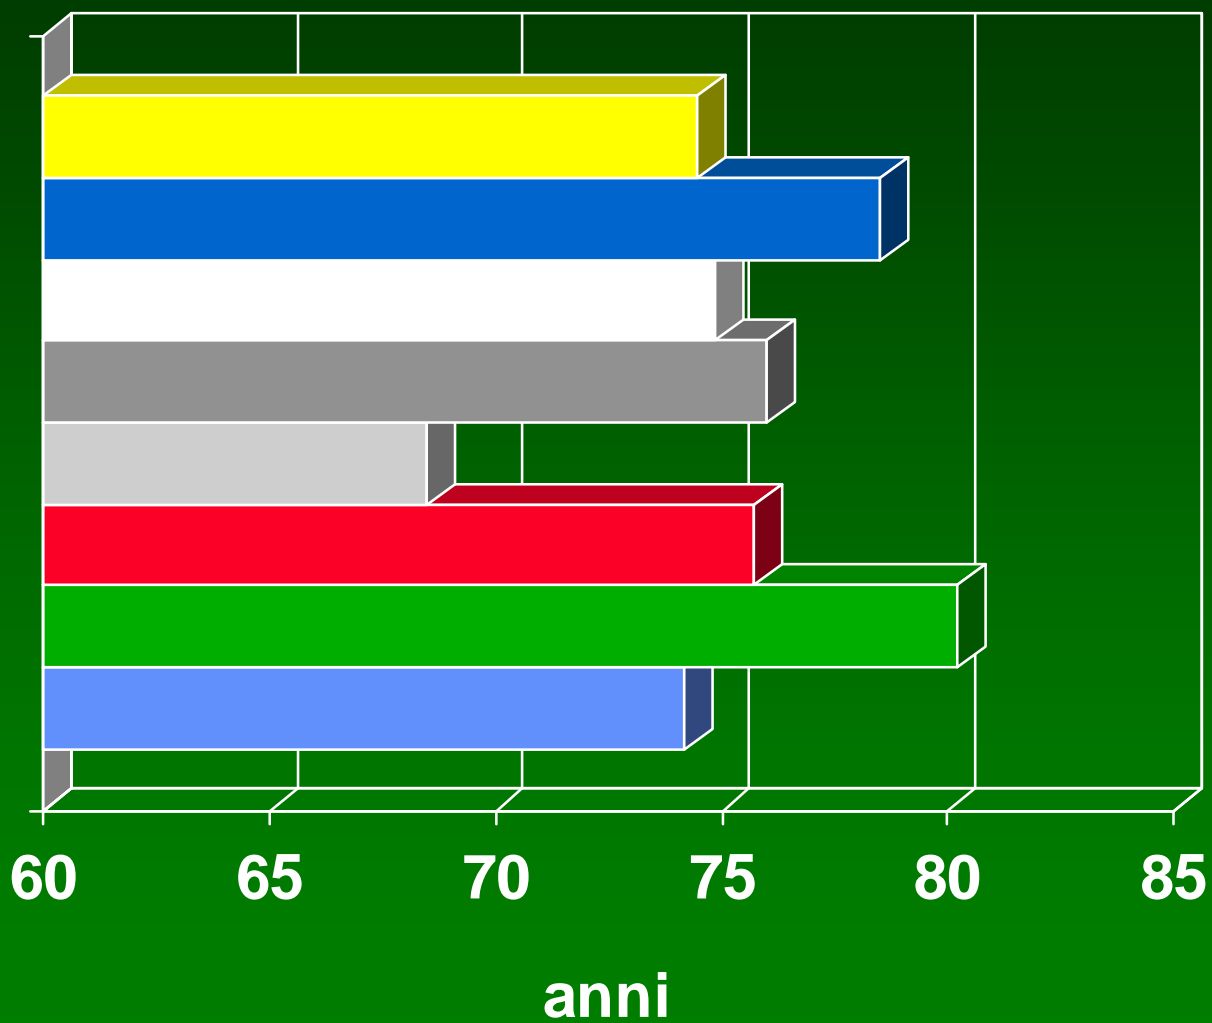

■ TX

Cause di mortalità nelle diverse metodiche

Età media per cause di decesso

- vascolare
- sconosciuta
- neoplasie
- infettiva
- gastrointestinale
- cardiaca
- cachessia
- altre

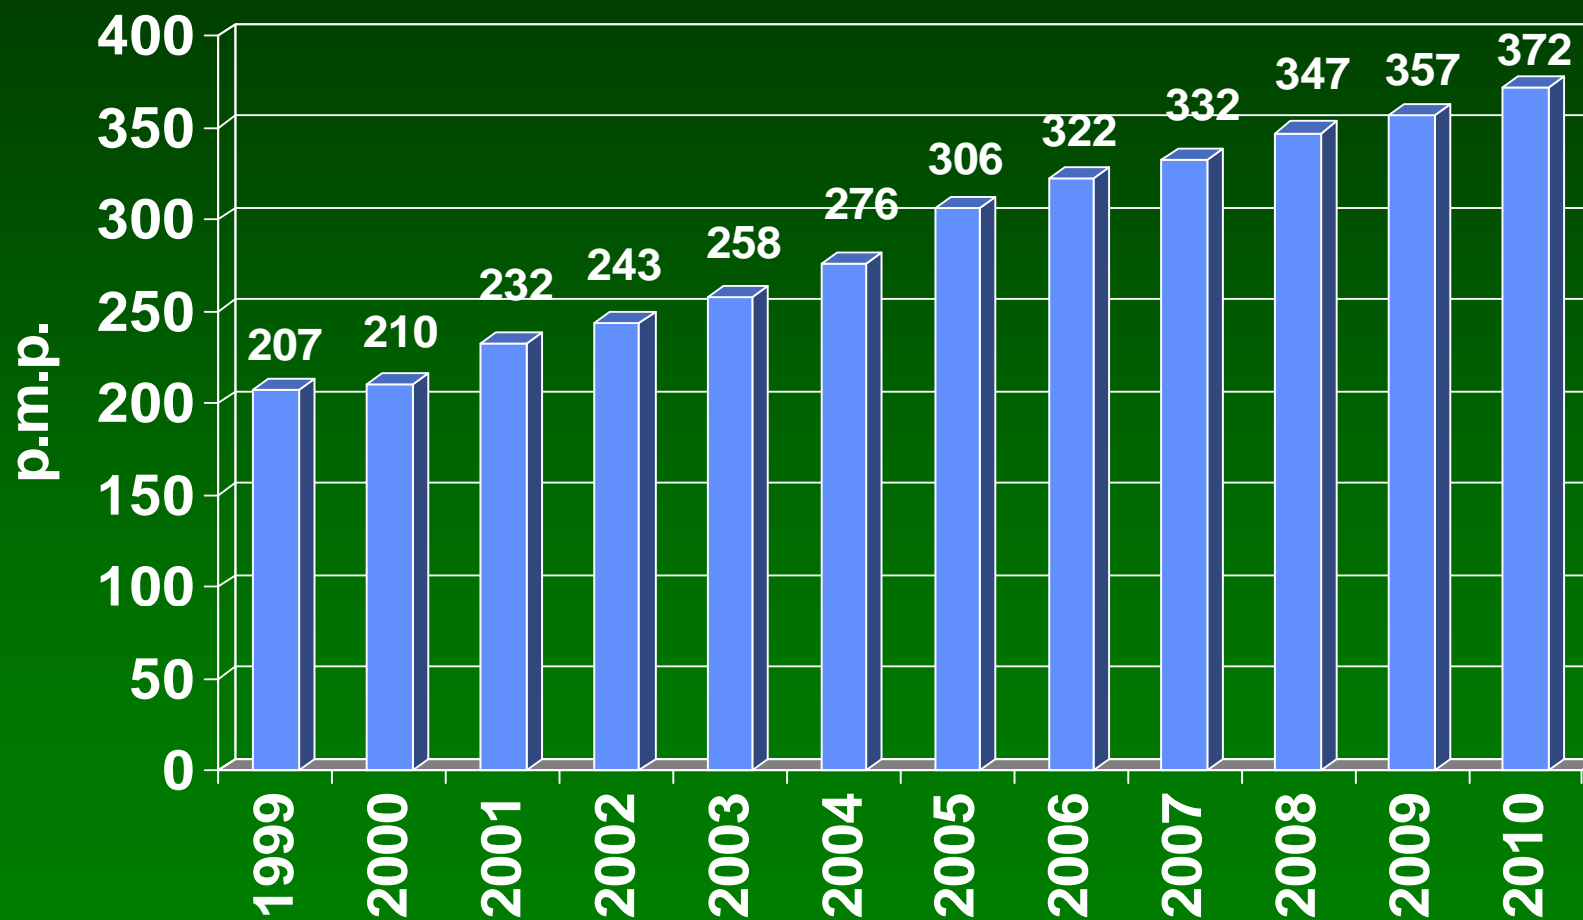

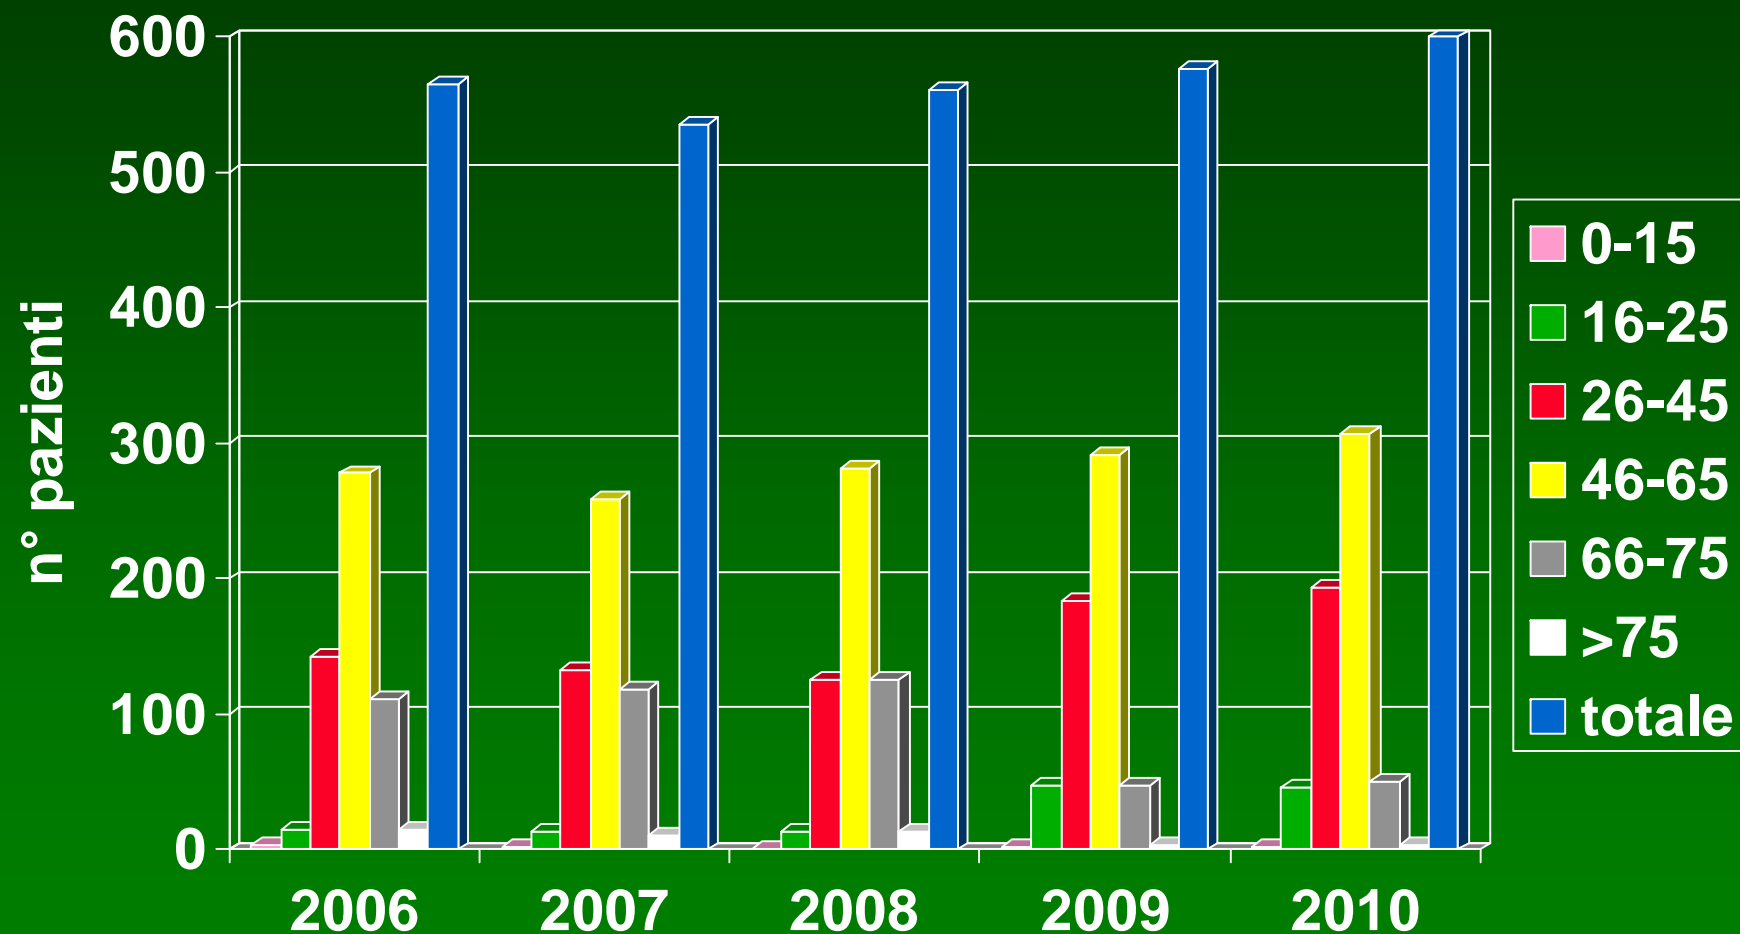

Trapianto

Pazienti portatori di trapianto di rene in Liguria (p.m.p.)

Pazienti portatori di rene trapiantato suddivisi per età
